1. Introduction

LoginIt is very efficient and user-friendly app for helping you to login to your favorite web sites and applications.

App was designed to make copying of login data as quick and easy as possible. The only thing you need to do is to choose what you want to copy. It really cannot be simpler.

Starting from version 2.0 app supports iCloud data synchronization – login data on all iOS devices with same iCloud account will be synchronized.

LoginIt is particularly useful when you login to the web TV, online streaming, iTunes, etc.

Just register Login/User ID and Password in your app. Later on you can easy copy them using very useful feature – auto copy of login and password:

- Login password is copied just by selecting it in app: copying operation is performed automatically during switching from LoginIt to another application.
- Information about copied item is communicated to the user by local notification.

Data can be protected by activating of PIN code.

You can customize the app functionality by using “Settings-function”.

App “[Help-function](#)” available in the app or on WWW contains detailed description of all functions, and options.

In the app has been implemented total saving/restoration of state – it means that app might be interrupted at any time (by phone call, pressing one of device buttons, screen lock) and your data will not be lost. When app is activated next time all new data will be restored.

2. Quick start

Let's quickly demonstrate app functionality by using example - login to "Find iPhone" app using John's iTunes account.

1) Tap "New" in main view and register new login record – in example John's login to iTunes:

The screenshot shows an iPhone interface for a form titled "LoginIt - Deatils". The status bar at the top indicates "Carrier", signal strength, Wi-Fi, time "14:57", and "100%" battery. The form has a "Done" button on the top left and a "Save" button on the top right. It contains three text input fields:

- Name, description:** iTunes - John
- Login, user name, e-mail:** john.smith@jz-it-konsult.com
- Password:** Rk2IVOfwNMbJDcFv5

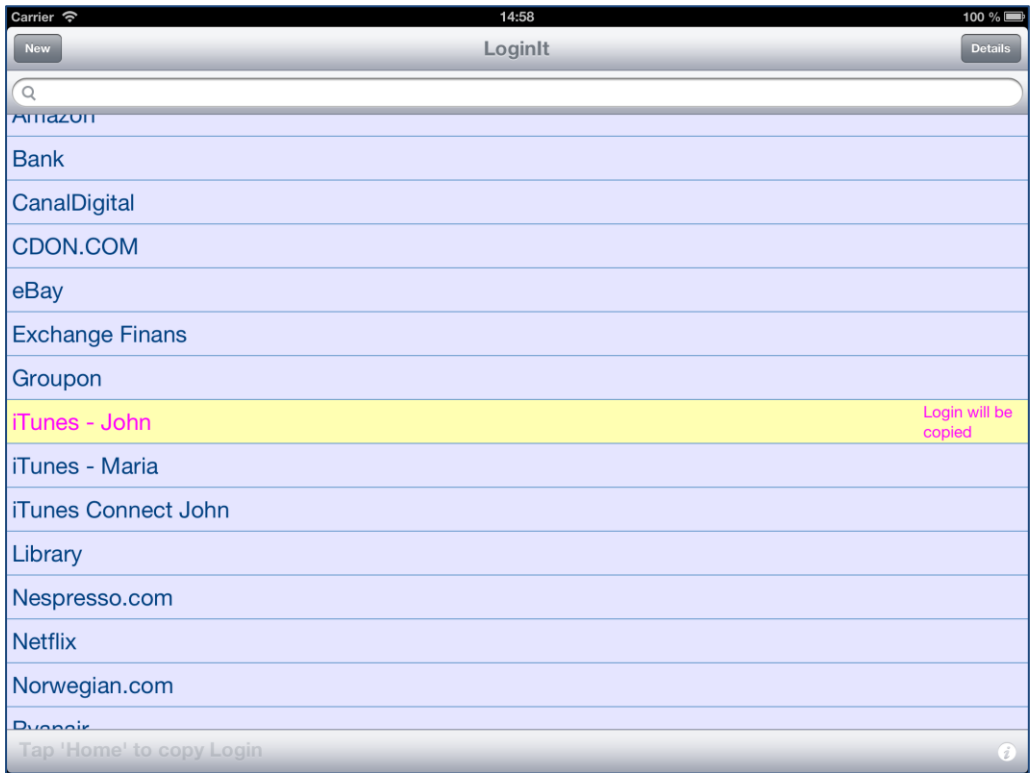

A "Delete" button is located at the bottom left of the form.

Enter:

- "Name, description" – name of login record, which will be visible from main view.
- "Login, user name, e-mail".
- "Password".

2) Tap “Save” to save record.

3) [Details view](#) will close, and you will see:

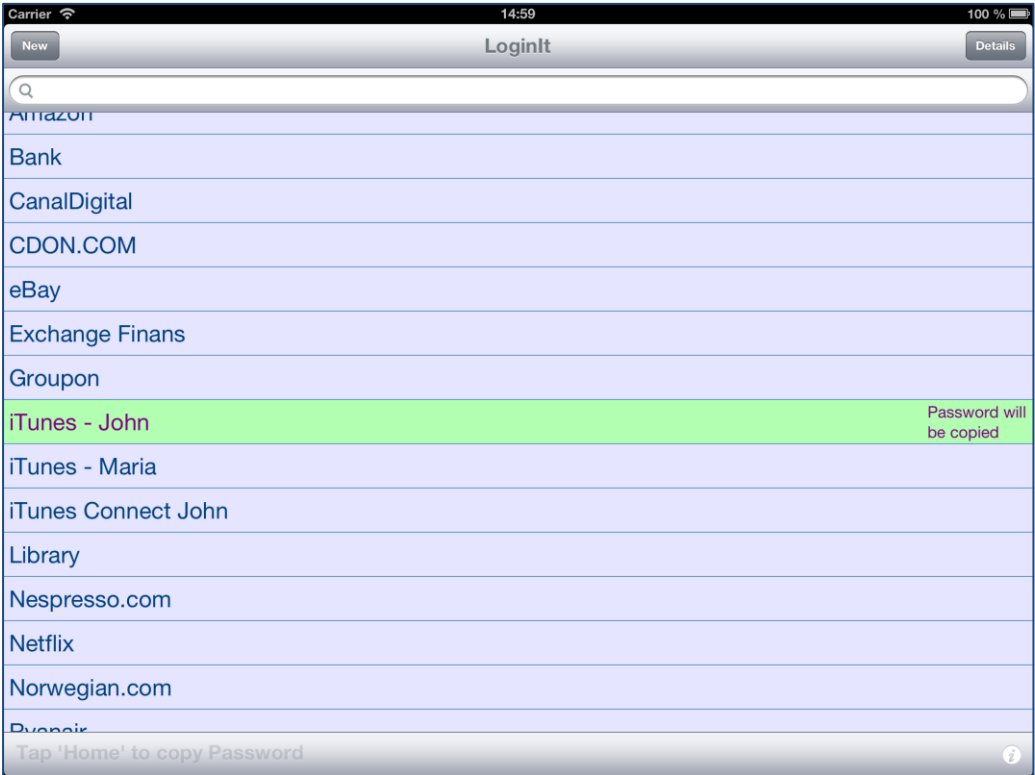

To the right of name of selected login record is information about item which will be copied next. In our case it is login.

4) Now tap or double tap “Home” to switch to “Find iPhone” app. You will see:

John's e-mail is copied to iPhone/iPad pasteboard (clipboard).

5) Switch to "Find iPhone" app and paste info to "Login" field. Switch back to LoginIt. You will see:

To the right of name of selected login record is information about login item which will be copied next. In our case it is password.

6) Now tap or double tap “Home” again to switch to “Find iPhone” app.
You will see:

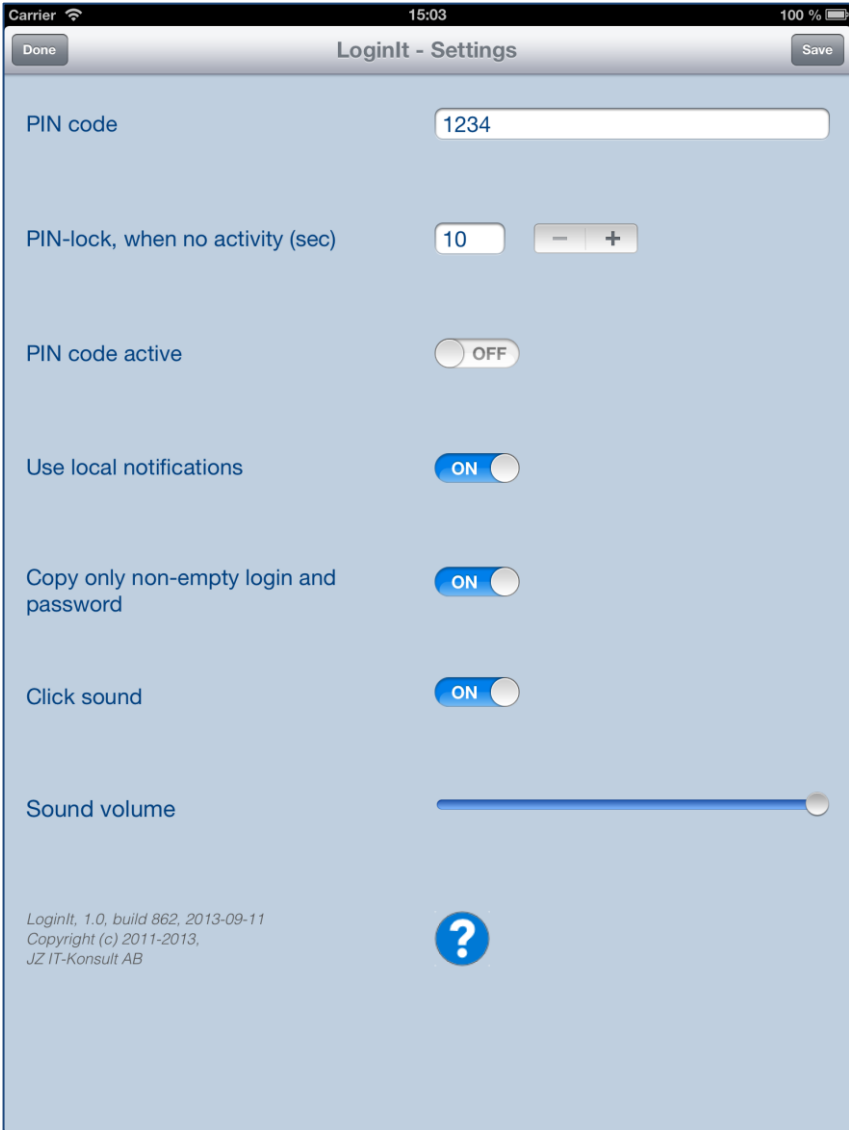

John’s password is copied to iPhone/iPad pasteboard (clipboard).

7) Switch to “Find iPhone” app and paste info to “Password” field.

[\[Back to top\]](#)

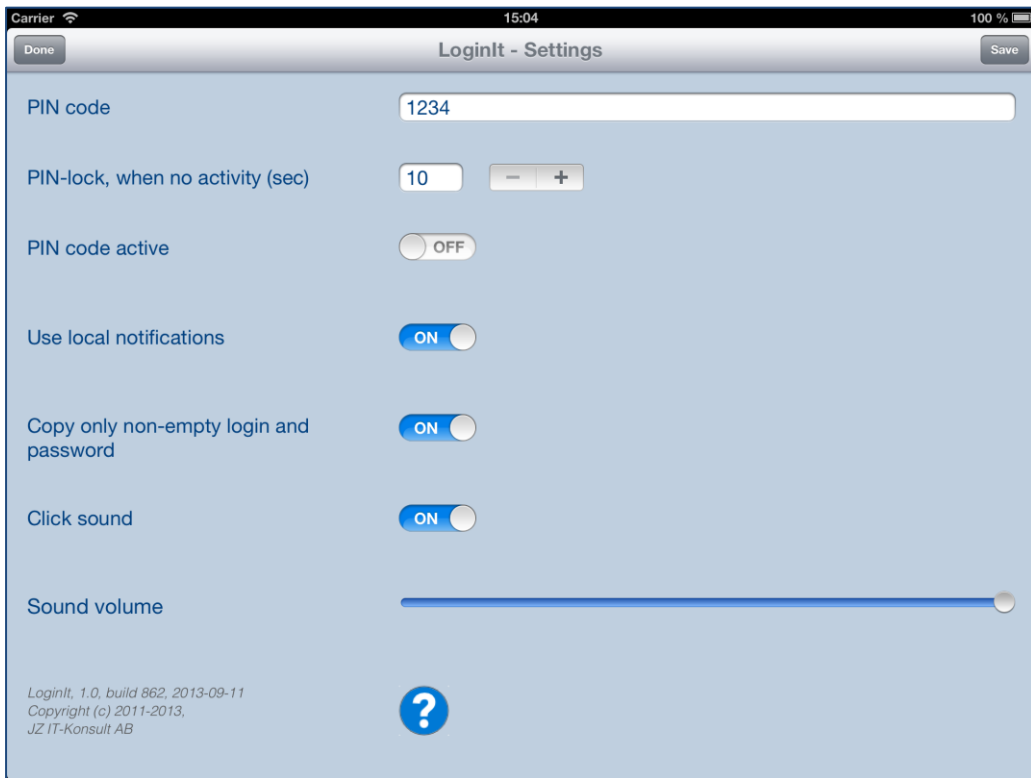

3. View orientation

All app views works in portrait and landscape orientation:

Portrait orientation

or

Landscape orientation

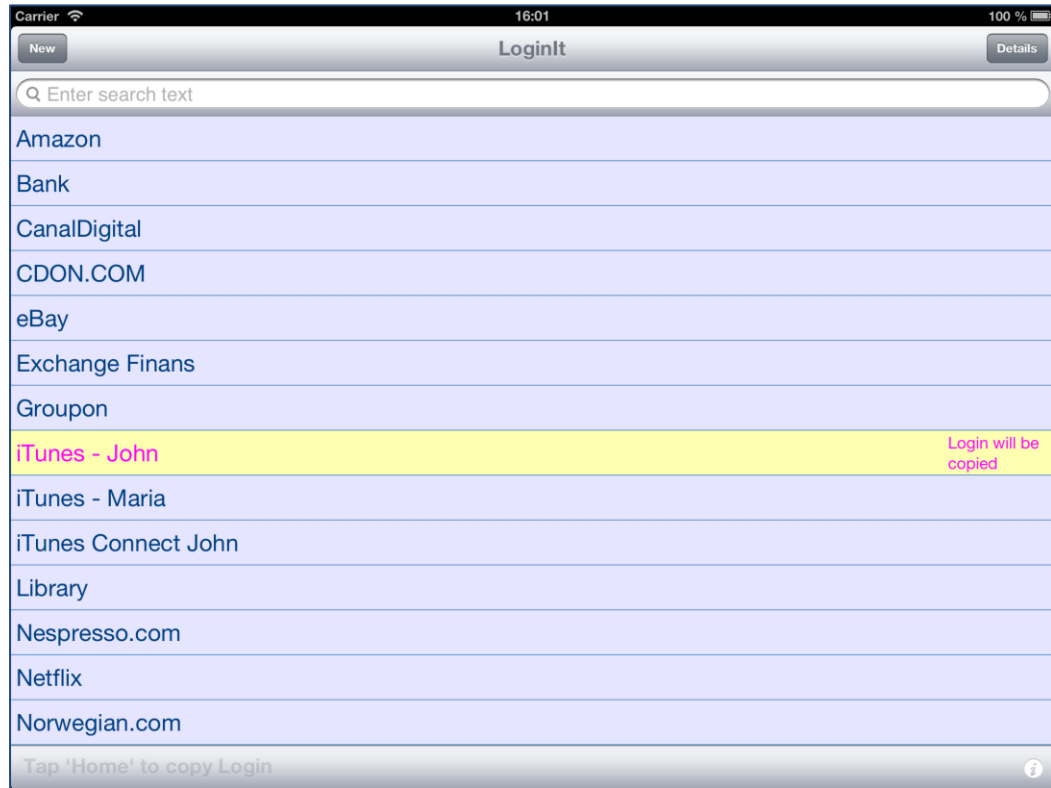

Just select orientation, which is most convenient for you. View orientation can be change at any time.

[\[Back to top\]](#)

4. Main view

It is view you will usually see when you start the app. View contains list of names of login records and controls which allow you access to all app functions and options. Login records are sorted by name alphabetically.

Automatic copying of login and passwords works only from this view.

When app was terminated in another view, next time you start app you will be directed to that view.

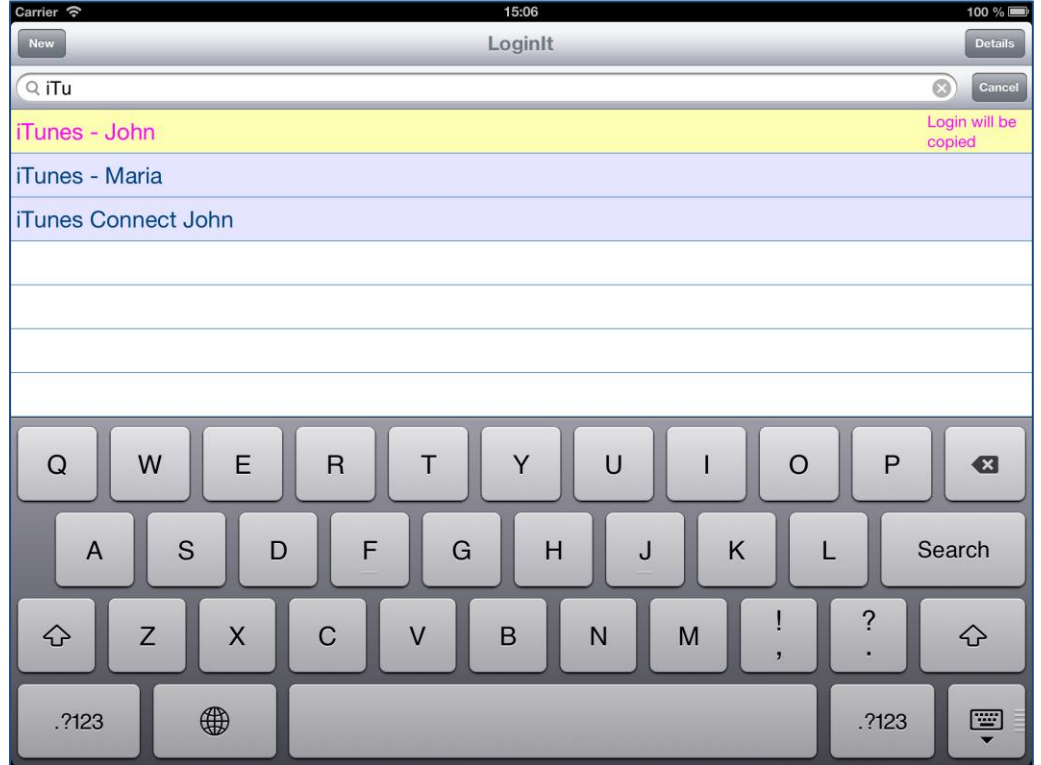

Here is detailed description of controls available from Main view:

Q Enter search text

Search bar – used for searching -"filtering" of logins.

When activated, view will show only logins, with name/description containing text entered in search bar.

Main view will change to:

Here:

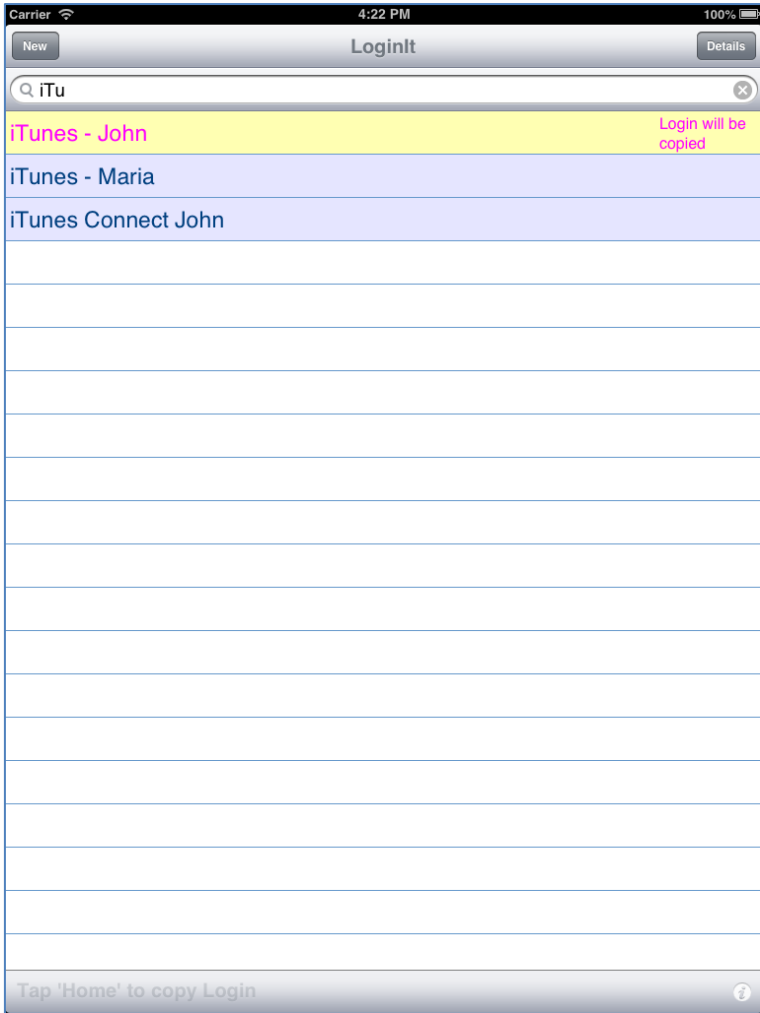

Keyboard

Search button – hides keyboard.

Main view will show only items, which satisfies search condition; search text stays in search bar:

Activated search bar, here:

“iTU”

Searched text

Button which clears search text.

Cancel button – terminates searching, search text is cleared, keyboard is hidden.

Starts [Details view](#) – view used for creation of new login records.

Opens [Details view](#) for editing or viewing of existing login records.

Activates [Settings view](#) – view used to change app parameters and options.

Except buttons you can also use gestures:

- 1) Double tap on login is equivalent to following actions:
 - a. Mark login.
 - b. Tap “Details” button.
- 2) Swipe login to the left or to the right will copy login item:

This functionality might be used when you want to skip copying login/password or if you want to copy login data (for example e-mail) to another record in LoginIt app.

Selected records in main view have different colors dependent on what will be copied next:

- Yellow color – login will be copied when you next time you tap “Home” button:

- Green color – password will be copied when you next time you tap “Home” button:

- Red color – empty login or password will be copied when you next time you tap “Home” button:

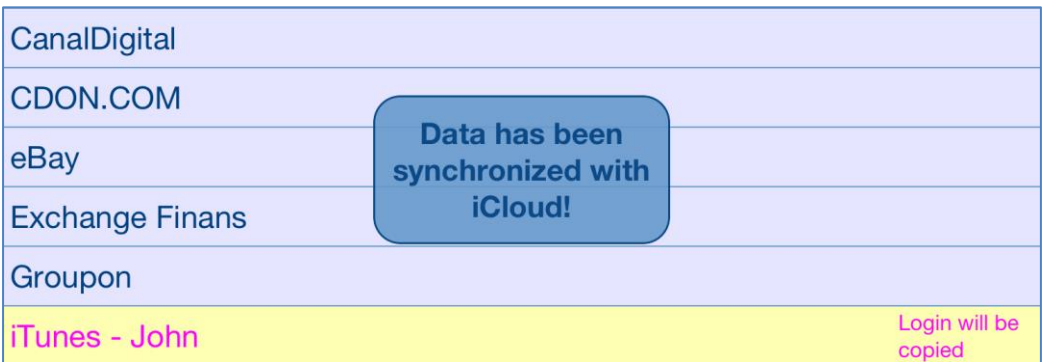

or

Starting from version 2.0 app supports iCloud data synchronization – login data on all iOS devices with same iCloud account will be synchronized.

To use this feature you need to activate “Document & Data” in settings of your iCloud account on all your iOS devices.

When data is synchronized the following message will be shown:

[\[Back to top\]](#)

5. Details view

The screenshot displays the 'LoginIt - Details' view on an iPhone. The interface includes a top status bar with 'Carrier', '15:24', and '100%' battery. Below the status bar is a header with a 'Done' button on the left, the title 'LoginIt - Details' in the center, and a 'Save' button on the right. The main content area contains three text input fields:

- Name, description:** iTunes - John
- Login, user name, e-mail:** john.smith@jz-it-konsult.com
- Password:** Rk2IVOfwNMbJDcFv5

At the bottom of the screen, there is a 'Delete' button.

LoginIt details view shows details about login:

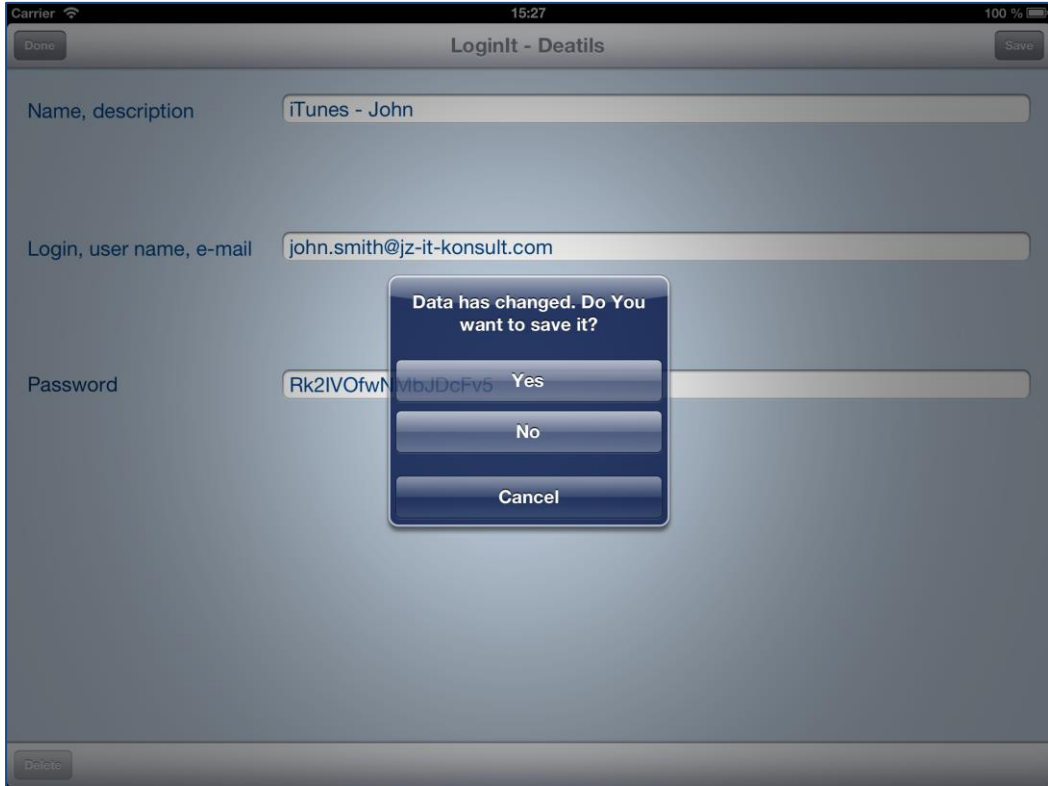

- 1) Name, description – name of login record shown in main view.
- 2) Login, user name, e-mail.
- 3) Password.

Just enter data and tap “Done” or “Save”.

Controls in this view:

Done

Terminate view without saving changes. When changes were made user will be prompted for decision what to do, by following alert:

The screenshot shows an iOS application interface titled "LoginIt - Deatils". The interface includes a "Done" button at the top left and a "Save" button at the top right. The form contains three input fields: "Name, description" with the value "iTunes - John", "Login, user name, e-mail" with the value "john.smith@jz-it-konsult.com", and "Password" with the value "Rk2lVOfwNmbJdCfv5". A modal alert dialog is displayed in the center, with the text "Data has changed. Do You want to save it?". The dialog has three buttons: "Yes", "No", and "Cancel". A "Delete" button is visible at the bottom left of the screen.

User will have three possibilities:

- 1) Save changes, and exit, by choosing "Yes".
- 2) Discard changes and exit, by selecting "No".
- 3) Continue editing, by selecting "Cancel".

Save

Terminate view and save changes. When data is not consistent you will get one of following alerts:

Record with same
name/description already
exists!

OK

There is already record with same name/description as current record.

Name/description is empty!

OK

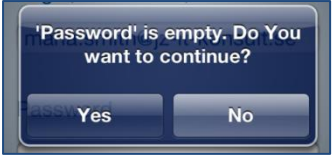

You are trying to save record without name/description.

'User name/login' and
'Password' are empty!

OK

You are trying to save record without login and password.

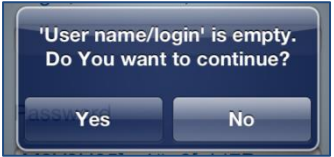

'Password' is empty. Do You
want to continue?

Yes

No

It is warning about empty password, if you want to have it so tap “Yes” otherwise tap “No”.

'User name/login' is empty.
Do You want to continue?

Yes

No

It is warning about empty login, if you want to have it so tap “Yes” otherwise tap “No”.

Except buttons you can also use gestures:

- Swiping to the right has same effect as tapping “Done” button.
- Swiping up moves to previous record and shows it in [Details view](#). It has same effect as:
 - Tapping “Done”

6. Settings view

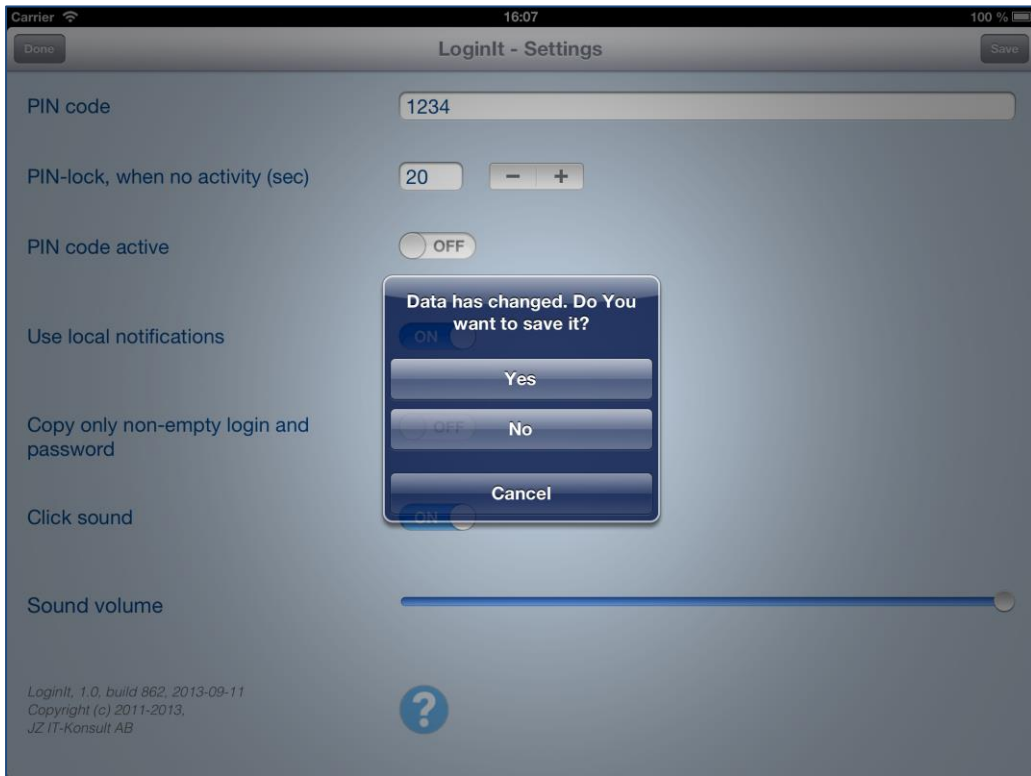

This view allows you to configure system parameters and settings. From this view you have also access [Help view](#).

Here is detailed description of controls available from settings view:

Terminate view.

When changes were made user will be prompted for decision what to do, by following alert:

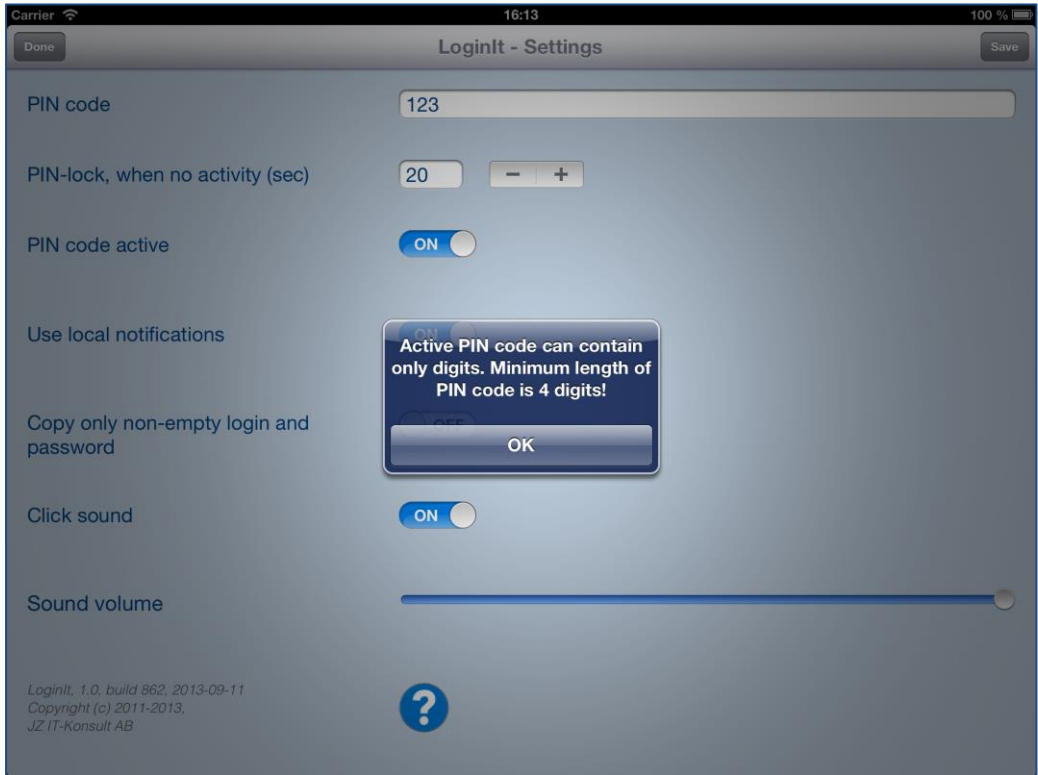

User will have three possibilities:

- 1) Save changes, and exit, by choosing “Yes”.
- 2) Discard changes and exit, by selecting “No”.
- 3) Continue editing, by selecting “Cancel”.

A rectangular button with rounded corners and a gradient background, containing the word 'Save' in a sans-serif font.

Terminate view and save changes.

When data is not consistent you will get following alert:

Pin code must contain only digits. Minimum length is 4 digits.

Show [Help view.](#)

PIN code	1234
----------	------

PIN code used to protect app data.

PIN-lock, when no activity (sec)

20

Determines time before app will be locked, when there is no activity in app. When app is in [Help view](#) locking is de-activated.

PIN code active

ON

Determines if PIN code is active – in use.

Use local notifications

ON

Determines if local notifications will be used to inform about copied items.

Copy only non-empty login and password

OFF

Determines if only non-empty login items will be used for copying.

Click sound

ON

Determines if sound effects will be used in app. Setting affects:

- Click sound
- Alert sound
- Local notifications sound

Sound volume

Determines volume of sound effects in app.

[\[Back to top\]](#)

7. PIN code view

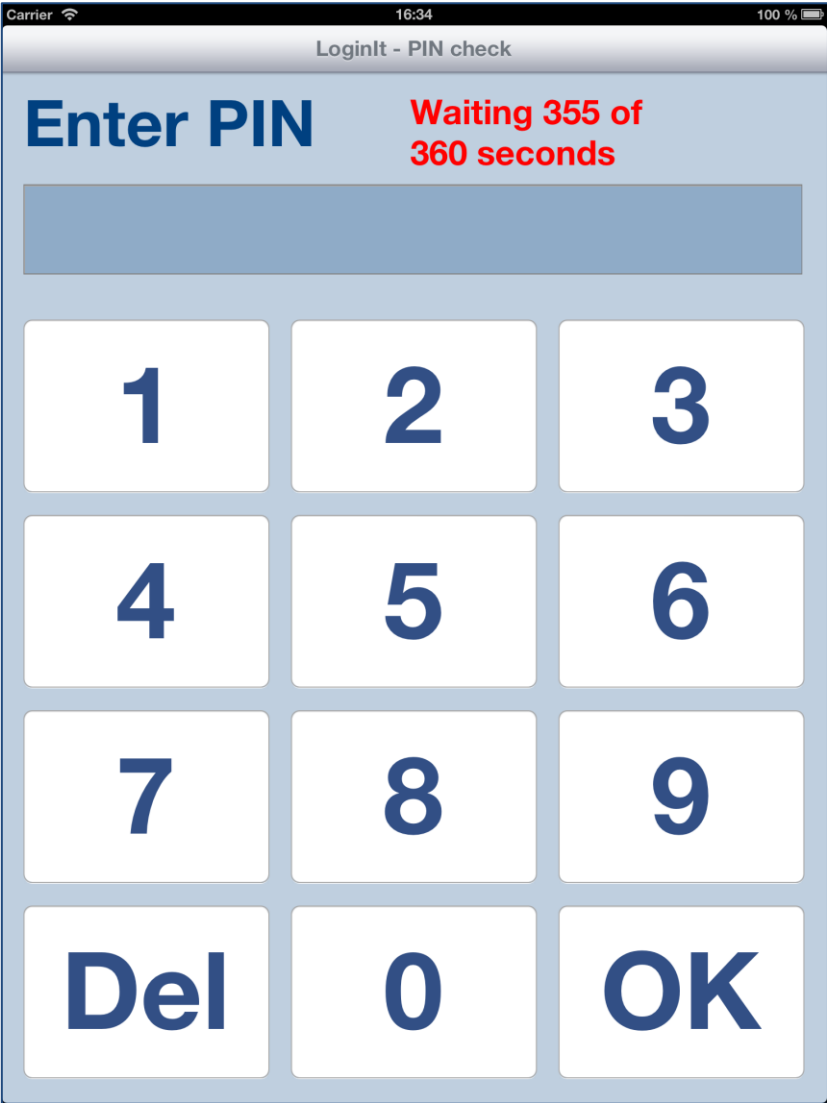

This view is used to enter PIN code, when PIN code is activated.

View will appear, when there is no activity in the app during time determined I app settings. It does not matter if app is running is in background or terminated.

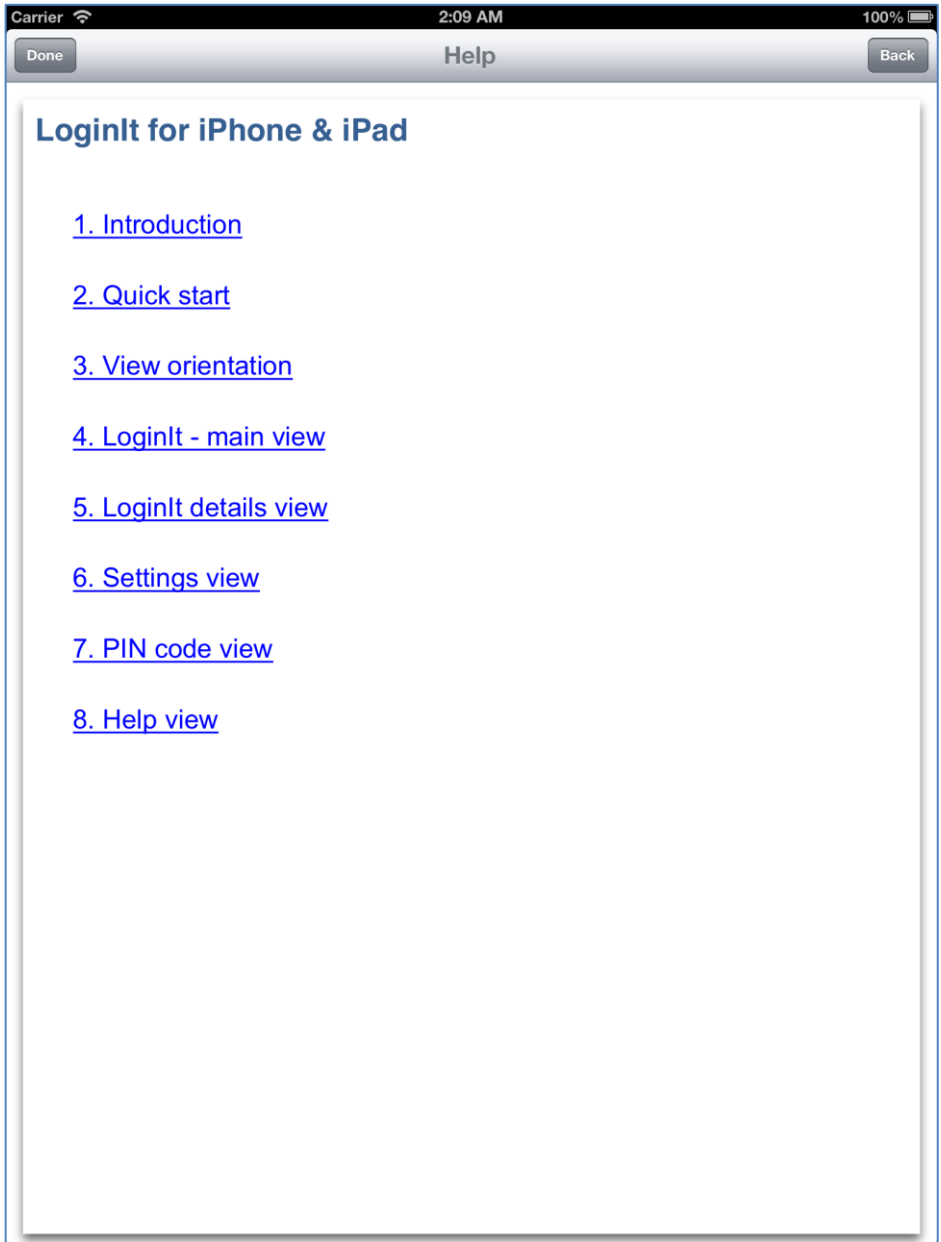

Setting of "PIN-lock when no activity" to something between 30 and 60 seconds should be enough to copy and paste login and password without re-entering PIN-code.

When wrong PIN code is entered 3 times in sequence app will be locked for 3 minutes. When after that wrong PIN code is entered 3 times in sequence app will be locked for 6 minutes, and so on:

[\[Back to top\]](#)

8. Help view

The only control available here is:

Terminate view.

Navigate to previous place in help.

This view shows user guide for app.
