# 1. Introduction

LoginIt is very efficient and user-friendly app for helping you to login to your favorite web sites and applications.

App was designed to make copying of login data as quick and easy as possible. The only thing you need to do is to choose what you want to copy. It really cannot be simpler.

Starting from version 2.0 app supports iCloud data synchronization – login data on all iOS devices with same iCloud account will be synchronized.

LoginIt is particularly useful when you login to the web TV, online streaming, iTunes, etc.

Just register Login/User ID and Password in your app. Later on

you can easy copy them using very useful feature – auto copy of login and password:

- Login password is copied just by selecting it in app: copying operation is performed automatically during switching from LoginIt to another application.
- Information about copied item is communicated to the user by local notification.

Data can be protected by activating of PIN code.

You can customize the app functionality by using “Settings-function”.

App “[Help-function](#)” available in the app or on WWW contains detailed description of all functions, and options.

In the app has been implemented total saving/restoration of state – it means that app might be interrupted at any time (by phone call, pressing one of device buttons, screen lock) and your data will not be lost. When app is activated next time all new data will be restored.

## 2. Quick start

Let's quickly demonstrate app functionality by using example - login to "Find iPhone" app using John's iTunes account.

- 1) Tap "New" in main view and register new login record – in example John's login to iTunes:

Carrier 

10:24

Done

**LoginIt - Deatils**

Save

Name, description

iTunes - John

Login, user name, e-mail

john.smith@jz-it-konsult.com

Password

Rk2IVOfwNMbJDcFv5

Delete

Enter:

- “Name, description” – name of login record, which will be visible from main view.
- “Login, user name, e-mail”.
- “Password”.

2) Tap “Save” to save record.

3) [Details view](#) will close, and you will see:

### 3. View orientation

All app views works in portrait and landscape orientation:

Portrait orientation

or

## Landscape orientation

Just select orientation, which is most convenient for you. View orientation can be change at any time.

[\[Back to top\]](#)

## 4. Main view

It is view you will usually see when you start the app. View contains list of names of login records and controls which allow you access to all app functions and options. Login records are sorted by name alphabetically.

Automatic copying of login and passwords works only from this view.

When app was terminated in another view, next time you start app you will be directed to that view.

Here is detailed description of controls available from Main view:

🔍 Enter search text

Search bar – used for searching - "filtering" of logins.

When activated, view will show only logins, with name/description containing text entered in search bar.

Main view will change to:

Searched text

Button which clears search text.

Cancel button – terminates searching, search text is cleared, keyboard is hidden.

A rectangular button with a light gray background and a blue border, containing the text "New" in a dark blue font.

Starts [Details view](#) – view used for creation of new login records.

A rectangular button with a light gray background and a blue border, containing the text "Details" in a dark blue font.

Opens [Details view](#) for editing or viewing of existing login records.

Activates [Settings view](#) – view used to change app parameters and options.

Except buttons you can also use gestures:

- 1) Double tap on login is equivalent to following actions:
  - a. Mark login.
  - b. Tap “Details” button.
- 2) Swipe login to the left or to the right will copy login item:

This functionality might be used when you want to skip copying login/password or if you want to copy login data (for example e-mail) to another record in LoginIt app.

Selected records in main view have different colors dependent on what will be copied next:

- Yellow color – login will be copied when you next time you tap “Home” button:

nespresso.com	
Netflix	Login will be copied
Norwegian.com	

- Green color – password will be copied when you next time you tap “Home” button:

nespresso.com	
Netflix	Password will be copied
Norwegian.com	

- Red color – empty login or password will be copied when you next time you tap “Home” button:

or

Starting from version 2.0 app supports iCloud data synchronization – login data on all iOS devices with same iCloud account will be synchronized.

To use this feature you need to activate “Document & Data” in settings of your iCloud account on all your iOS devices.

When data is synchronized the following message will be shown:

[\[Back to top\]](#)

LoginIt details view shows details about login

- 1) Name, description – name of login record shown in main view.
- 2) Login, user name, e-mail.
- 3) Password.

Just enter data and tap “Done” or “Save”.

**Controls in this view:**

Terminate view without saving changes. When changes were

made user will be prompted for decision what to do, by following alert:

User will have three possibilities:

- 1) Save changes, and exit, by choosing “Yes”.
- 2) Discard changes and exit, by selecting “No”.
- 3) Continue editing, by selecting “Cancel”.

Save

Terminate view and save changes. When data is not consistent you will get one of following alerts:

**Record with same name/  
description already exists!**

OK

There is already record with same name/description as current record.

**Name/description is empty!**

OK

You are trying to save record without name/description.

**'User name/login' and  
'Password' are empty!**

**OK**

You are trying to save record  
without login and password.

**'Password' is empty. Do You  
want to continue?**

**Yes**

**No**

It is warning about empty password, if you want to have it so tap “Yes” otherwise tap “No”.

It is warning about empty login, if you want to have it so tap “Yes” otherwise tap “No”.

Except buttons you can also use gestures:

- Swiping to the right has same effect as tapping “Done” button.
- Swiping up moves to previous record and shows it in [Details view](#). It has same effect as:
  - Tapping “Done”
  - Selecting previous record
  - Tapping “Details”

When there is no previous record, the following will be shown:

- Swiping down moves to previous record and shows it in [Details view](#). It has same effect as:
  - Tapping “Done”
  - Selecting previous record
  - Tapping “Details”

- When there is no next record, the following will be shown:

## 6. Settings view

The screenshot shows the settings screen for the LoginIt application. At the top, the status bar displays 'Carrier' with a signal strength icon, the time '10:38', and a battery level icon. Below the status bar, the app title 'LoginIt - Settings' is centered, with 'Done' on the left and 'Save' on the right. The settings are organized into several sections:

- PIN code:** A text input field containing the number '1234'.
- PIN-lock, when no activity (sec):** A numeric input field containing '10', with minus and plus buttons to its right for adjustment.
- PIN code active:** A toggle switch that is currently turned on (blue).
- Use local notifications:** A toggle switch that is currently turned on (blue).
- Copy only non-empty login and password:** A toggle switch that is currently turned on (blue).
- Click sound:** A toggle switch that is currently turned on (blue).
- Sound volume:** A slider control with a white knob positioned approximately in the middle of the range.

At the bottom left, the version and copyright information is displayed: 'LoginIt, 1.0, build 977, 2013-09-20, Copyright (c) 2011-2013, JZ IT-Konsult AB'. At the bottom right, there is a circular blue button with a white question mark icon, likely for help or support.

This view allows you to configure system parameters and settings. From this view you have also access [Help view](#).

Here is detailed description of controls available from settings view:

Pin code must contain only digits.  
Minimum length is 4 digits.

Show [Help view.](#)

PIN code

123

PIN code used to protect app  
data.

PIN-lock,  
when no  
activity (sec)

10

–

+

Determines time before app will  
be locked, when there is no

activity in app. When app is in [Help view](#) locking is de-activated.

PIN code active

Determines if PIN code is active – in use.

Use local notifications

Determines if local notifications will be used to inform about copied items.

Copy only non-empty login and password

Determines if only non-empty login items will be used for copying.

Click sound

Determines if sound effects will be used in app. Setting affects:

- Click sound
- Alert sound
- Local notifications sound

Sound volume

Determines volume of sound effects in app.

[\[Back to top\]](#)

## 7. PIN code view

This view is used to enter PIN code, when PIN code is activated.

View will appear, when there is no activity in the app during time determined in app settings. It does not matter if app is running in background or terminated.

Setting of “PIN-lock when no activity” to something between 30 and 60 seconds should be enough to copy and paste login and password without re-entering PIN-code.

When wrong PIN code is entered 3 times in sequence app will be locked for 3 minutes. When after that wrong PIN code is entered 3

times in sequence app will be locked for 6 minutes, and so on:
