1. Introduction

LoginIt is very efficient and user-friendly app for helping you to login to your favorite web sites and applications.

App was designed to make copying of login data as quick and easy as possible. The only thing you need to do is to choose what you want to copy. It really cannot be simpler.

Starting from version 2.0 app supports iCloud data synchronization – login data on all iOS devices with same iCloud account will be synchronized.

LoginIt is particularly useful when you login to the web TV, online streaming, iTunes, etc.

Just register Login/User ID and Password in your app. Later on you can easy copy them using very useful feature – auto copy of login and password:

- Login password is copied just by selecting it in app: copying operation is performed automatically during switching from LoginIt to another application.
- Information about copied item is communicated to the user by local notification.

Data can be protected by activating of PIN code.

You can customize the app functionality by using “Settings-function”.

App “[Help-function](#)” available in the app or on WWW contains detailed description of all functions, and options.

In the app has been implemented total saving/restoration of state – it means that app might be interrupted at any time (by phone call, pressing one of device buttons, screen lock) and your data will not be lost. When app is activated next time all new data will be restored.

[\[Back to top\]](#)

2. Quick start

Let's quickly demonstrate app functionality by using example - login to "Find iPhone" app using John's iTunes account.

- 1) Tap "New" in main view and register new login record – in example John's login to iTunes:

The screenshot shows an iPhone interface for a 'Login - Details' form. The status bar at the top displays 'Carrier', signal strength, '09:22', and battery level. The navigation bar contains 'Done', 'Login - Details', and 'Save'. The form has the following fields:

- Name, description:** iTunes - John
- Login, user name, e-mail:** john.smith@jz-it-konsult.com
- Password:** Rk2IVOfwNMbJDcFv5

A 'Delete' button is located at the bottom of the screen.

Enter:

- “Name, description” – name of login record, which will be visible from main view.
- “Login, user name, e-mail”.
- “Password”.

2) Tap “Save” to save record.

3) [Details view](#) will close, and you will see:

Carrier 	1:25 PM	
New	LoginIt	Details
<input type="text" value="Enter search text"/>		
CDON.COM		
eBay		
Exchange Finans		
Groupon		
iTunes - John	Login will be copied	
iTunes - Maria		
iTunes Connect Johr		
Library		
Nespresso.com		
Netflix		
'Home' to copy Login		

To the right of name of selected login record is information about

item which will be copied next. In our case it is login.

4) Now tap or double tap “Home” to switch to “Find iPhone” app. You will see:

John's e-mail is copied to iPhone/iPad pasteboard (clipboard).

- 5) Switch to "Find iPhone" app and paste info to "Login" field.

Switch back to LoginIt. You will see:

To the right of name of selected login record is information about login item which will be copied next. In our case it is password.

- 6) Now tap or double tap "Home" again to switch to "Find iPhone" app. You will see:

LoginIt now

Copied: 'Password' for iTunes - John

LoginIt

Safari

John's password is copied to iPhone/iPad pasteboard (clipboard).

7) Switch to "Find iPhone" app and paste info to "Password" field.

[\[Back to top\]](#)

3. View orientation

All app views works in portrait and landscape orientation:

Portrait orientation

or

Landscape orientation

Just select orientation, which is most convenient for you. View orientation can be change at any time.

[\[Back to top\]](#)

4. Main view

It is view you will usually see when you start the app. View contains list of names of login records and controls which allow you access to all app functions and options. Login records are sorted by name alphabetically.

Automatic copying of login and passwords works only from this view.

When app was terminated in another view, next time you start app you will be directed to that view.

Here is detailed description of controls available from Main view:

Search bar – used for searching - "filtering" of logins.

When activated, view will show only logins, with name/description containing text entered in search bar.

Main view will change to:

Button which clears search text.

Cancel button – terminates searching, search text is cleared, keyboard is hidden.

Starts [Details view](#) – view used for creation of new login records.

Details

Opens [Details view](#) for editing or viewing of existing login records.

Activates [Settings view](#) – view used to change app parameters and options.

Except buttons you can also use gestures:

- 1) Double tap on login is equivalent to following actions:
 - a. Mark login.
 - b. Tap “Details” button.

2) Swipe login to the left or to the right will copy login item:

This functionality might be used when you want to skip copying login/password or if you want to copy login data (for example e-mail) to another record in LoginIt app.

Selected records in main view have different colors dependent on what will be copied next:

- Yellow color – login will be copied when you next time you tap “Home” button:

nespresso.com	
Netflix	Login will be copied
Norwegian.com	

- Green color – password will be copied when you next time you tap “Home” button:

nespresso.com	
Netflix	Password will be copied
Norwegian.com	

- Red color – empty login or password will be copied when you next time you tap “Home” button:

or

Starting from version 2.0 app supports iCloud data synchronization – login data on all iOS devices with same iCloud account will be synchronized.

To use this feature you need to activate “Document & Data” in settings of your iCloud account on all your iOS devices.

When data is synchronized the following message will be shown:

7. PIN code view

This view is used to enter PIN code, when PIN code is activated.

The image shows a mobile application interface for PIN entry. At the top, the status bar displays "Carrier" with a signal strength icon, the time "10:04", and a battery level icon. Below the status bar, the title "LoginIt - PIN check" is centered. The main content area has a light blue background and features the text "Enter PIN" in a large, bold, dark blue font. Below this text is a rectangular input field with a thin border. Underneath the input field is a numeric keypad with four rows of buttons. The first row contains buttons for digits "1", "2", and "3". The second row contains buttons for digits "4", "5", and "6". The third row contains buttons for digits "7", "8", and "9". The fourth row contains buttons for "Del", "0", and "OK". All buttons are light blue with dark blue text.

View will appear, when there is no activity in the app during time determined in app settings. It does not matter if app is running or in background or terminated.

Setting of “PIN-lock when no activity” to something between 30 and 60 seconds should be enough to copy and paste login and password without re-entering PIN-code.

When wrong PIN code is entered 3 times in sequence app will be locked for 3 minutes. When after that wrong PIN code is entered 3 times in sequence app will be locked for 6 minutes, and so on:
