# 1. Introduction

LoginIt is very efficient and user-friendly app for helping you to login to your favorite web sites and applications.

App was designed to make copying of login data as quick and easy as possible. The only thing you need to do is to choose what you want to copy. It really cannot be simpler.

Starting from version 2.0 app supports iCloud data synchronization – login data on all iOS devices with same iCloud account will be synchronized.

LoginIt is particularly useful when you login to the web TV, online streaming, iTunes, etc.

Just register Login/User ID and Password in your app. Later on you can easy copy them using very useful feature – auto copy of login and password:

- Login password is copied just by selecting it in app: copying

operation is performed automatically during switching from LoginIt to another application.

- Information about copied item is communicated to the user by local notification.

If you wish you can generate strong random passwords, which are highly secure and difficult to crack or guess.

Data can be protected by activating of PIN code.

You can customize the app functionality by using “Settings-function”.

App “[Help-function](#)” available in the app or on WWW contains detailed description of all functions, and options.

In the app has been implemented total saving/restoration of state – it means that app might be interrupted at any time (by phone call, pressing one of device buttons, screen lock) and your data will not be lost. When app is activated next time all new data will be restored.

App is optimized for iOS8, iOS7, iOS6, iOS5.

Pictures in current documentation are taken from iOS8 and iOS7.x version of Locatelt. On devices, which are running older versions of iOS (6.x and 5.x) some controls will look slightly different. Following table contains couple of examples of such differences.

## Stepper

iOS6.x, iOS5.x

iOS8.x, iOS7.x:

## Slider

iOS5.x, iOS6.x

iOS8.x, iOS7.x:

## Text field

iOS6.x, iOS5.x

A screenshot of a text field from iOS 5.x and 6.x. The field is a rounded rectangle with a light blue background and a thin border. It contains the email address "john.smith@jz-it-konsult.se" in a dark blue font.

iOS8.x, iOS7.x:

A screenshot of a text field from iOS 7.x and 8.x. The field is a rounded rectangle with a light blue background and a thin border. It contains the email address "john.smith@jz-it-konsult.se" in a dark blue font.

## 2. Quick start

Let's quickly demonstrate app functionality by using example - login to "Find iPhone" app using John's iTunes account.

- 1) Tap "New" in main view and register new login record – in example John's login to iTunes:

New

LoginIt

Details

Canal Digital

ComvIQ

eBay

Google

iTunes - John

Login will be  
copied

iTunes Connect Johr

iTunes Maria

Library

Nespresso.cpm

'Home' to copy Login

Enter:

- “Name, description” – name of login record, which will be visible from main view.
- “Login, user name, e-mail”.
- “Password”, you may tap “Generate” button – in this case password will be generated for you.

2) Tap “Save” to save record.

3) [Details view](#) will close, and you will see:

New

LoginIt

Details

Bilia JZ IT- Konsult AB

Canal Digital

ComvIQ

eBay

Google

iTunes - John

Login will be  
copied

iTunes Connect John

iTunes Maria

Library

Nespresso.cpm

Netflix

To the right of name of selected login record is information about item which will be copied next. In our case it is login.

4) Now tap or double tap “Home” to switch to “Find iPhone” app. You will see:

John's e-mail is copied to iPhone/iPad pasteboard (clipboard).

- 5) Switch to "Find iPhone" app and paste info to "Login" field. Switch back to LoginIt. You will see:

To the right of name of selected login record is information about login item which will be copied next. In our case it is password.

ComvIQ

eBay

Google

iTunes - John

Password will  
be copied

iTunes Connect Johr

iTunes Maria

Library

Nespresso.cpm

'Home' to copy Password

6) Now tap or double tap “Home” again to switch to “Find iPhone” app. You will see:

John's password is copied to iPhone/iPad pasteboard (clipboard).

- 7) Switch to "Find iPhone" app and paste info to "Password" field.

[\[Back to top\]](#)

### 3. View orientation

All app views works in portrait and landscape orientation:

portrait orientation

or

## Landscape orientation

Just select orientation, which is most convenient for you. View orientation can be change at any time.

[\[Back to top\]](#)

## 4. Main view

It is view you will usually see when you start the app. View contains list of names of login records and controls which allow you access to all app functions and options.

Login records are sorted by name alphabetically.

Automatic copying of login and passwords works only from this view.

When app was terminated in another view, next time you start

app you will be directed to that view.

Here is detailed description of controls available from Main view:

Search bar – used for searching -"filtering" of logins.

When activated, view will show only logins, with name/description containing text entered in search bar.

Main view will change to:

Carrier

Search

Here:

Keyboard

Tapping  
on  
Search  
button  
hides  
keyboard

Main view will show only items, which satisfies search condition; search text stays in search bar:

Carrier 

6:41 AM

New

LoginIt

Details

 ba 

BankId (p)

Password will  
be copied

eBay

'Home' to copy Password

Activated search bar, here:

“ba”

Searched text

Button which  
clears search  
text.

Starts [Details view](#) – view  
used for creation of new login  
records.

Opens [Details view](#) for editing  
or viewing of existing login  
records.

Activates [Settings view](#) – view used to change app parameters and options.

### **Double tap on login.**

Same as following actions:

- 1) Mark login.
- 2) Tap “Details” button.

**Swipe login to the left or to the right.**

Copy next item “Login” or “Password”:

This functionality might be used when you want to skip coping login/password or if you want to copy login data (for example e-mail) to another record in LoginIt app.

Selected records in main view

have different colors dependent on what will be copied next:

- Yellow color – login will be copied when you next time you tap “Home” button:

- Green color – password will be copied when you next time you tap “Home” button:

- Red color – empty login or password will be copied when you next time you tap “Home” button:

Wizzair.com

Empty Login  
will be copi...

or

iTunes Connect John

Empty Password  
will be copied

Starting from version 2.0 app supports iCloud data synchronization – login data on all iOS devices with same iCloud account will be synchronized. To use this feature you need to activate “Document & Data” in settings of your iCloud account on all your iOS devices.

When data is synchronized the following message will be shown:

[\[Back to top\]](#)

## 5. Details view

Length

32

-

+

Delete

User will have three

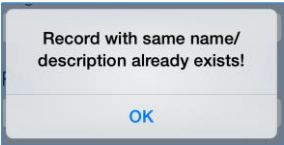

possibilities:

- 1) Save changes, and exit, by choosing “Yes”.
- 2) Discard changes and exit, by selecting “No”.
- 3) Continue editing, by selecting “Cancel”.

Save

Terminate view and save changes. When data is not consistent you will get one of following alerts:

**Record with same name/  
description already exists!**

OK

There is already record with

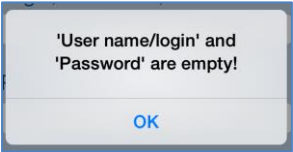

same name/description as current record.

An alert dialog box with a light gray background and a blue border. It contains the text "Name/description is empty!" and an "OK" button at the bottom.

**Name/description is empty!**

OK

You are trying to save record without name/description.

An alert dialog box with a light gray background and a blue border. It contains the text "'User name/login' and 'Password' are empty!" and an "OK" button at the bottom.

**'User name/login' and  
'Password' are empty!**

OK

You are trying to save record without login and password.

**'Password' is empty. Do You  
want to continue?**

Yes

No

It is warning about empty password, if you want to have it so tap “Yes” otherwise tap “No”.

**'User name/login' is empty.  
Do You want to continue?**

Yes

No

It is warning about empty login, if you want to have it so tap “Yes” otherwise tap “No”.

Generate

Generate password.

A,B,C,...

Use capital letters in  
automatically generated  
password.

a,b,c,...

Use lower case letters in  
automatically generated  
password.

Use digits in automatically generated password.

Use special characters in automatically generated password.

Defines length of automatically generated password.

**Swiping to the right.**

Same effect as taping "Done" button.

Swiping up moves to previous record and shows it in **Details view**.

It has same effect as:

- Tapping “Done”
- Selecting previous record
- Tapping “Details”
- When there is no previous record, the following will be shown

Swiping down moves to previous record and shows it in **Details view**.

It has same effect as:

- Tapping “Done”
- Selecting previous record
- Tapping “Details”
- When there is no next record, the following will be shown:

Determines if PIN code is active – in use.

Use local notifications

Determines if local notifications will be used to inform about copied items.

Copy only non-empty  
login and password

Determines if only non-empty login items will be used for copying.

Click sound

Determines if sound effects will be used in app. Setting affects:

- Click sound
- Alert sound
- Local notifications sound

Sound volume

Determines volume of sound effects in app.

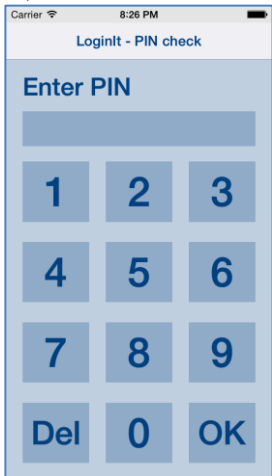

**Swipe to the right**

Same as Done-button.

[\[Back to top\]](#)

## 7. PIN code view

This view is used to enter PIN code, when PIN code is activated.

The screenshot shows a mobile application interface for PIN entry. At the top, the status bar displays 'Carrier' with a signal strength icon, the time '8:26 PM', and a battery level icon. Below the status bar, the title 'LoginIt - PIN check' is centered. The main content area has a light blue background and features the text 'Enter PIN' in a large, bold, dark blue font. Below the text is a wide, empty rectangular input field. Underneath the input field is a numeric keypad with buttons for digits 1 through 9, 0, 'Del', and 'OK'. The buttons are arranged in a 4x3 grid. The 'Del' button is located at the bottom left, the '0' button is at the bottom middle, and the 'OK' button is at the bottom right.

View will appear, when there is no activity in the app during time determined by app settings. It does not matter if app is running in background or terminated.

Setting of “PIN-lock when no activity” to something between 30 and 60 seconds should be enough to copy and paste login and password without re-entering PIN-code.

When wrong PIN code is entered 3 times in sequence app will be locked for 3 minutes. When after that wrong PIN code is entered 3 times in sequence app will be locked for 6 minutes, and so on:
