1. Introduction

LoginIt is very efficient and user-friendly app for helping you to login to your favorite web sites and applications.

App was designed to make copying of login data as quick and easy as possible. The only thing you need to do is to choose what you want to copy. It really cannot be simpler.

Starting from version 2.0 app supports iCloud data synchronization – login data on all iOS devices with same iCloud account will be synchronized.

LoginIt is particularly useful when you login to the web TV, online streaming, iTunes, etc.

Just register Login/User ID and Password in your app. Later on you can easy copy them using very useful feature – auto copy of login and password:

- Login password is copied just by selecting it in app: copying operation is performed automatically during switching from LoginIt to another application.
- Information about copied item is communicated to the user by local notification.

If you wish you can generate strong random passwords, which are highly secure and difficult to crack or guess.

Data can be protected by activating of PIN code.

You can customize the app functionality by using “Settings-function”.

App “[Help-function](#)” available in the app or on WWW contains detailed description of all functions, and options.

In the app has been implemented total saving/restoration of state – it means that app might be interrupted at any time (by phone call, pressing one of device buttons, screen lock) and your data will not be lost. When app is activated next time all new data will be restored.

App is optimized for iOS8, iOS7, iOS6, iOS5.

Pictures in current documentation are taken from iOS8 and iOS7.x version of Locatelt. On devices, which are running older versions of iOS (6.x and 5.x) some controls will look slightly different.

Following table contains couple of examples of such differences.

Stepper

iOS6.x, iOS5.x

iOS8.x, iOS7.x:

2. Quick start

Let's quickly demonstrate app functionality by using example - login to "Find iPhone" app using John's iTunes account.

- 1) Tap "New" in main view and register new login record – in example John's login to iTunes:

Done

Deatils

Save

Name, description

Login, user name, e-mail

Password

A,B,C,...

1,2,3,...

a,b,c,...

!,@,#,...

Length

Delete

Enter:

- “Name, description” – name of login record, which will be visible from main view.
- “Login, user name, e-mail”.
- “Password”, you may tap “Generate” button – in this case password will be generated for you.

2) Tap “Save” to save record.

3) [Details view](#) will close, and you will see:

New

LoginIt

iTunes - John

Login will be copied

iTunes Connect John

iTunes Maria

Library

Nespresso.cpm

Netflix

'Home' to copy Login

To the right of name of selected login record is information about item which will be copied next. In our case it is login.

- 4) Now tap or double tap "Home" to switch to "Find iPhone" app. You will see:

LoginIt

Copied: 'Login' for iTunes - John

login

LoginIt

Safari

John's e-mail is copied to iPhone/iPad
pasteboard (clipboard).

5) Switch to “Find iPhone” app and paste info to “Login” field. Switch back to LoginIt. You will see:

To the right of name of selected login record is information about login item which will be copied next. In our case it is password.

'Home' to copy Password

- 6) Now tap or double tap “Home” again to switch to “Find iPhone” app. You will see:

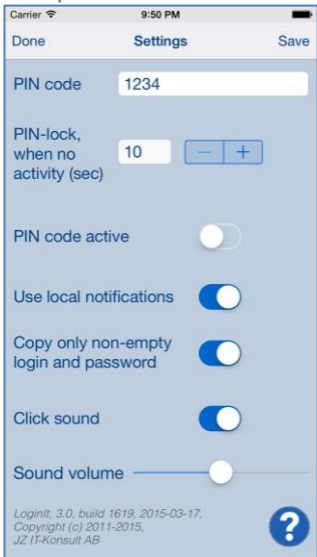

John's password is copied to iPhone/iPad pasteboard (clipboard).

- 7) Switch to "Find iPhone" app and paste info to "Password" field.

3. View orientation

All app views works in portrait and landscape orientation:

portrait orientation

or

Landscape orientation

Just select orientation, which is most convenient for you. View orientation can be change at any time.

[\[Back to top\]](#)

4. Main view

It is view you will usually see when you start the app. View contains list of names of login records and controls which allow you access to all app functions and options. Login records are sorted by name alphabetically.

Automatic copying of login and passwords works only from this view.

When app was terminated in another view, next time you start app you will be directed to that view.

Here is detailed description of controls available from Main view:

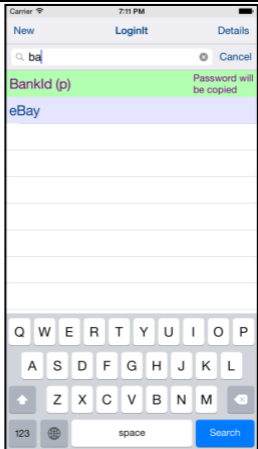

🔍 Enter search text

Search bar – used for searching -
"filtering" of logins.

When activated, view will show only
logins, with name/description
containing text entered in search
bar.

Main view will change to:

Here:

Keyboard

Search

Tapping on
Search button
hides
keyboard.

Main view will show only items,
which satisfies search condition;
search text stays in search bar:

[New](#)[Logint](#)[Details](#) ba **BankId (p)**Password will
be copied

eBay

'Home' to copy Password

Activated search bar, here:

“ba”

Searched text

Button which
clears search
text.

Starts [Details view](#) – view used for creation of new login records.

Opens [Details view](#) for editing or viewing of existing login records.

Activates [Settings view](#) – view used to change app parameters and options.

Double tap on login.

Same as following actions:

- 1) Mark login.
- 2) Tap “Details” button.

Swipe login to the left or to the right.

Copy next item “Login” or “Password”:

This functionality might be used when you want to skip copying login/password or if you want to copy login data (for example e-mail) to another record in LoginIt app.

Selected records in main view have different colors dependent on what will be copied next:

- Yellow color – login will be copied when you next time you tap "Home" button:

Netflix

Login will be copied

- Green color – password will be copied when you next time you tap “Home” button:

Netflix

Password will
be copied

- Red color – empty login or password will be copied when you next time you tap “Home” button:

Wizzair.com

Empty Login
will be copi...

or

iTunes Connect John

Empty Password
will be copied

Starting from version 2.0 app supports iCloud data synchronization – login data on all iOS devices with same iCloud account will be synchronized.

To use this feature you need to activate “Document & Data” in settings of your iCloud account on all your iOS devices.

When data is synchronized the following message will be shown:

[\[Back to top\]](#)

User will have three possibilities:

- 1) Save changes, and exit, by choosing "Yes".
- 2) Discard changes and exit, by selecting "No".
- 3) Continue editing, by selecting "Cancel".

A rectangular button with a light gray background and a thin blue border. The word "Save" is centered on the button in a dark blue, sans-serif font.

Terminate view and save changes. When data is not consistent you will get one of following alerts:

An alert dialog box with a light gray background and rounded corners. It has a thin blue border. The text "Record with same name/ description already exists!" is centered in bold black font. Below the text is a horizontal line, and at the bottom center is the word "OK" in blue font.

**Record with same name/
description already exists!**

OK

There is already record with same name/description as current record.

Name/description is empty!

This is a screenshot of a mobile application error dialog box. The dialog has a light gray background with rounded corners and a thin blue border. It is divided into two sections by a horizontal line. The top section contains the error message in bold black text. The bottom section contains a blue 'OK' button.

OK

You are trying to save record without name/description.

**'User name/login' and
'Password' are empty!**

This is a screenshot of a mobile application error dialog box. The dialog has a light gray background with rounded corners and a thin blue border. It is divided into two sections by a horizontal line. The top section contains the error message in bold black text. The bottom section contains a blue 'OK' button.

OK

You are trying to save record without login and password.

'Password' is empty. Do You want to continue?

Yes

No

It is warning about empty password, if you want to have it so tap “Yes” otherwise tap “No”.

'User name/login' is empty. Do You want to continue?

Yes

No

It is warning about empty login, if you want to have it so tap “Yes” otherwise tap “No”.

Generate

Generate password.

A,B,C,...

Use capital letters in automatically generated password.

a,b,c,...

Use lower case letters in automatically generated password.

1,2,3,...

Use digits in automatically generated password.

Use special characters in automatically generated password.

Defines length of automatically generated password.

Swiping to the right.

Same effect as tapping "Done" button.

Swiping up moves to previous record and shows it in Details view.

It has same effect as:

- Tapping “Done”
- Selecting previous record
- Tapping “Details”
- When there is no previous record, the following will be shown:

Swiping down moves to previous record and shows it in Details view.

It has same effect as:

- Tapping “Done”
- Selecting previous record
- Tapping “Details”
- When there is no next record, the following will be shown:
-
