8. Help view

1. Introduction

LoginIt is very efficient and user-friendly app for helping you to login to your favorite web sites and applications.

App was designed to make copying of login data as quick and easy as possible. The only thing you need to do is to choose what you want to copy. It really cannot be simpler.

Starting from version 2.0 app supports iCloud data synchronization – login data on all iOS devices with same iCloud account will be synchronized.

LoginIt is particularly useful when you login to the web TV, online streaming, iTunes, etc.

Just register Login/User ID and Password in your app. Later on you can easy copy them using very useful feature – auto copy of login and password:

- Login password is copied just by selecting it in app: copying operation is performed automatically during switching from LoginIt to another application.
- Information about copied item is communicated to the user by local notification.

If you wish you can generate strong random passwords, which are highly secure and difficult to crack or guess.

Data can be protected by activating of PIN code.

You can customize the app functionality by using “Settings-function”.

App “[Help-function](#)” available in the app or on WWW contains detailed description of all functions, and options.

In the app has been implemented total saving/restoration of state – it means that app might be interrupted at any time (by phone call, pressing one of device buttons, screen lock) and your data will not be lost. When app is activated next time all new data will be restored.

App is optimized for iOS9, iOS8, iOS7, iOS6, iOS5.

Pictures in current documentation are taken mainly from iPhone 6 Plus, iOS8.x and iOS7.x version of LoginIt. On devices, which are running older versions of iOS (6.x and 5.x) some controls will look slightly different. Following table contains couple of examples of such differences.

2. Quick start

Let’s quickly demonstrate app functionality by using example - login to “Find iPhone” app using John’s iTunes account.

- 1) Tap “New” in main view and register new login record – in example John’s login to iTunes:

Carrier

6:27 AM

100%

☒

Length

32

-

+

Delete

- Enter:
- “Name, description” – name of login record, which will be visible from main view.
 - “Login, user name, e-mail”.
 - “Password”, you may tap “Generate” button – in this case password will be generated for you.

2) Tap “Save” to save record.

3) [Details view](#) will close, and you will see:

Carrier	6:36 AM	100%
New	LoginIt	Details

Tap 'Home' to copy Login		ⓘ

To the right of name of selected login record is information about item which will be copied next. In our case it is login.

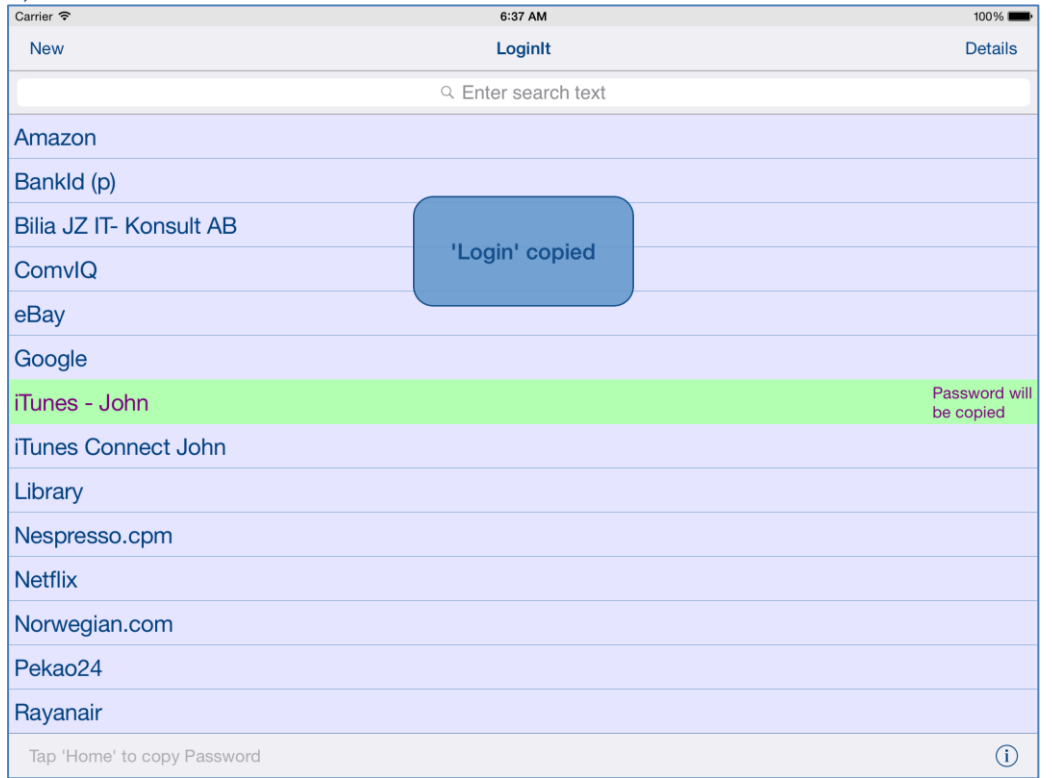

4) Now tap or double tap “Home” to switch to “Find iPhone” app. You will see:

John’s e-mail is copied to iPhone/iPad pasteboard (clipboard).

5) Switch to “Find iPhone” app and paste info to “Login” field. Switch back to LoginIt. You will see:

6)

To the right of name of selected login record is information about login item which will be copied next. In our case it is password.

- 7) Now tap or double tap “Home” again to switch to “Find iPhone” app.
You will see:

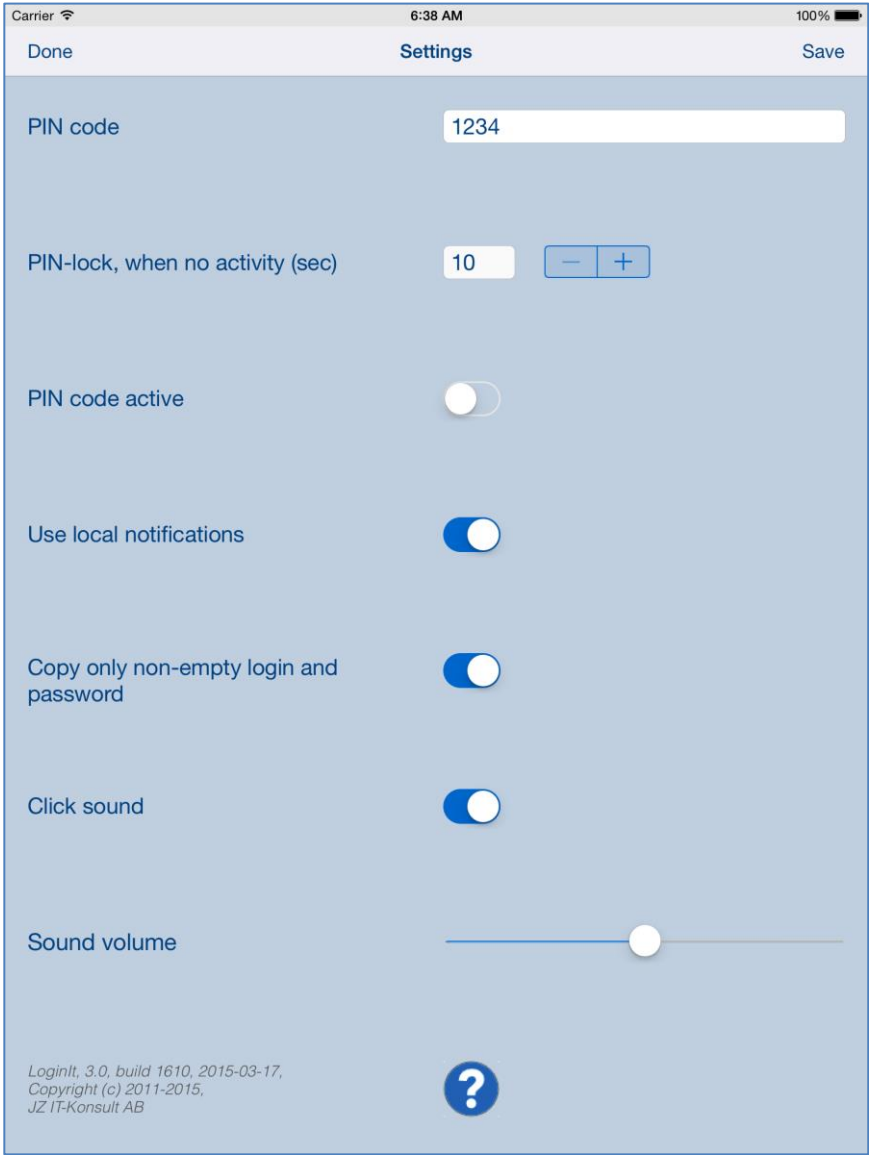

John's password is copied to iPhone/iPad pasteboard (clipboard).

- 8) Switch to “Find iPhone” app and paste info to “Password” field.

[\[Back to top\]](#)

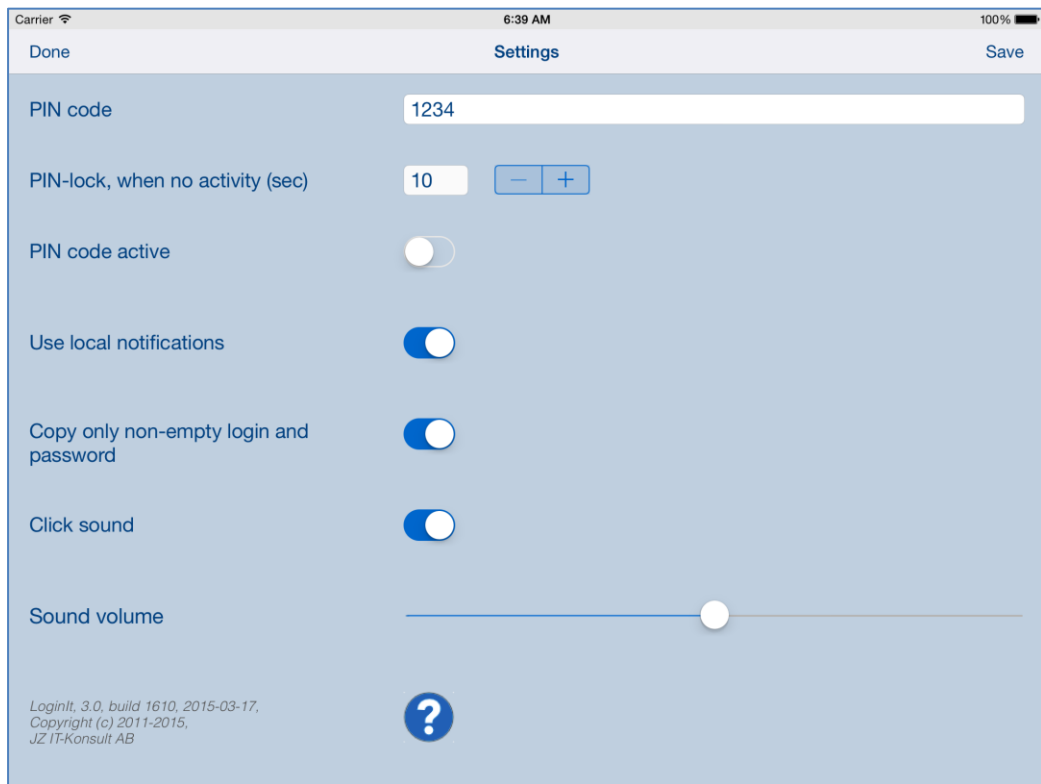

3. View orientation

All app views works in portrait and landscape orientation:

portrait orientation

or

Landscape orientation

Just select orientation, which is most convenient for you. View orientation can be change at any time.

[\[Back to top\]](#)

4. Main view

It is view you will usually see when you start the app. View contains list of names of login records and controls which allow you access to all app functions and options. Login records are sorted by name alphabetically.

Automatic copying of login and passwords works only from this view.

Tap 'Home' to copy Login		ⓘ

When app was terminated in another view, next time you start app you will be directed to that view.

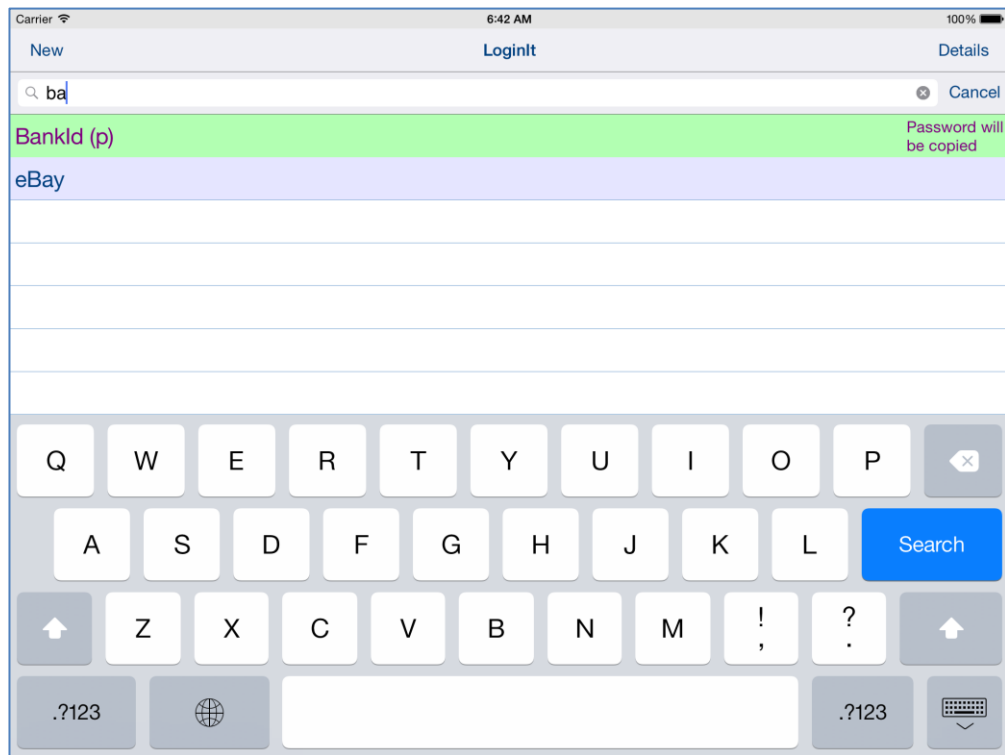

Here is detailed description of controls available from Main view:

🔍 Enter search text

Search bar – used for searching -"filtering" of logins.

When activated, view will show only logins, with name/description containing text entered in search bar.

Main view will change to:

Here:

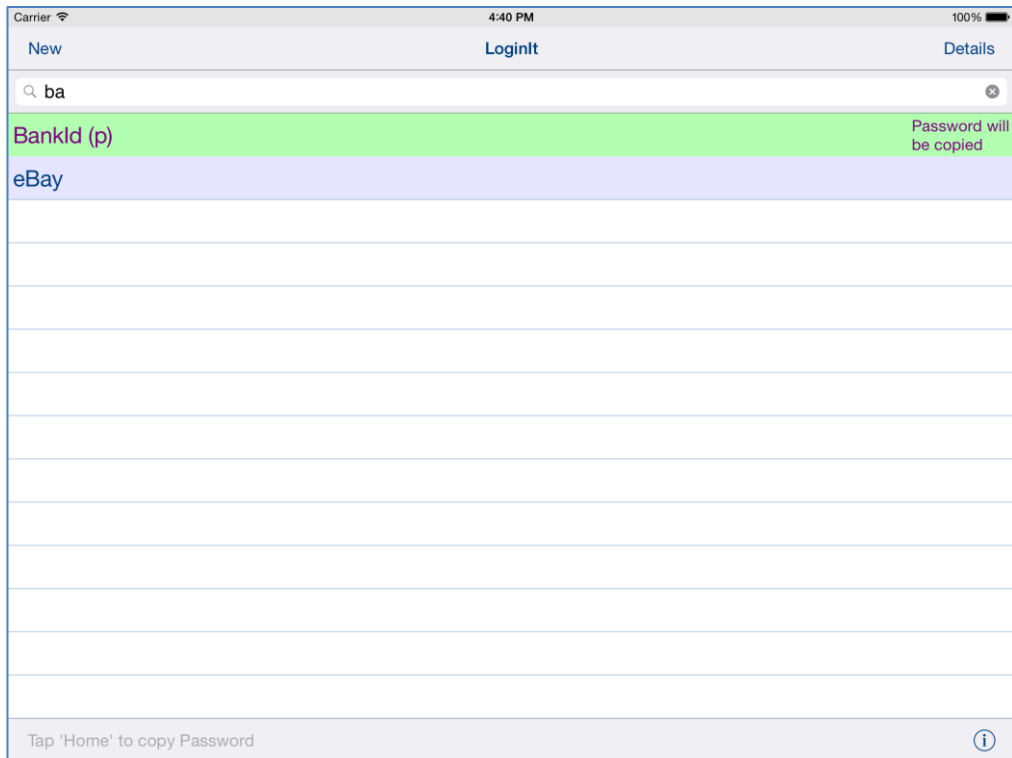

Keyboard

Tapping on Search button hides keyboard.

When Search key is tapped Main view will show only items, which satisfies search condition; search text stays in search bar:

Activated search bar, here:

“ba”

Searched text

Button which clears search text.

Starts [Details view](#) – view used for creation of new login records.

Opens [Details view](#) for editing or viewing of existing login records.

Activates [Settings view](#) – view used to change app parameters and options.

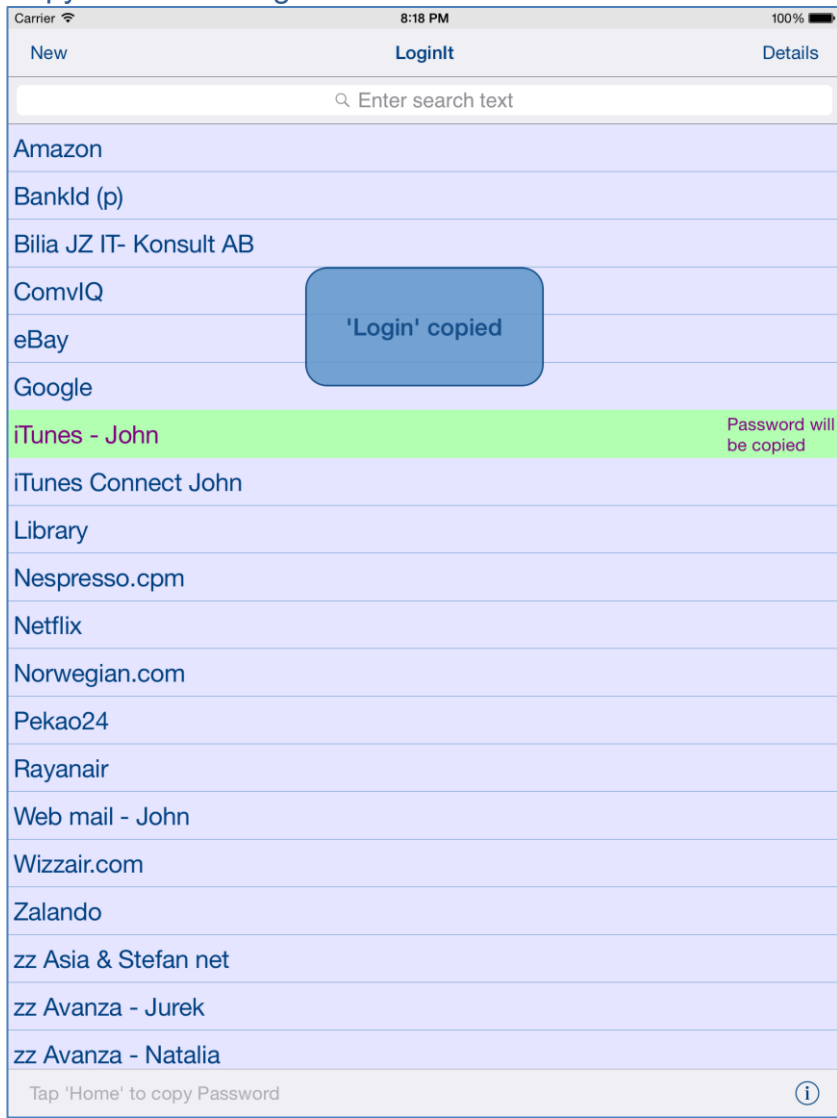

Double tap on login.

Same as following actions:

- 1) Mark logn.
- 2) Tap “Details” button.

Swipe login to the left or to the right.

Copy next item “Login” or “Password”:

This functionality might be used when you want to skip coping login/password or if you want to copy login data (for example e-mail) to another record in LoginIt app.

Selected records in main view have different colors dependent on what will be copied next:

- Yellow color – login will be copied when you next time you tap “Home” button:

Netflix	Login will be copied
---------	----------------------

- Green color – password will be copied when you next time you tap “Home” button:

Netflix	Password will be copied
---------	-------------------------

- Red color – empty login or password will be copied when you next time you tap “Home” button:

Wizzair.com	Empty Login will be copi...
-------------	-----------------------------

or

iTunes Connect John	Empty Password will be copied
---------------------	-------------------------------

Starting from version 2.0 app supports iCloud data synchronization – login data on all iOS devices with same iCloud account will be synchronized.

To use this feature you need to activate “Document & Data” in settings of your iCloud account on all your iOS devices.

When data is synchronized the following message will be shown:

Carrier 8:43 PM 100%

Tap 'Home' to copy Login ⓘ

5. Details view

The screenshot shows the 'Details view' of a login record in the LoginIt application. The interface is a mobile app with a light blue background. At the top, there's a status bar with 'Carrier', signal strength, '8:44 PM', and '100%' battery. Below the status bar is a header with 'Done', 'Deatils' (misspelled), and 'Save'. The main content area has several fields: 'Name, description' with the value 'iTunes - John'; 'Login, user name, e-mail' with the value 'john.smith@jz-it-konsult.se'; 'Password' with a complex string '99H|n\CJnaAGcy_\$o;|f_:aHp{-/P]%'. Below the password field is a 'Generate' button. There are four toggle switches: 'A,B,C,...' (on), '1,2,3,...' (on), 'a,b,c,...' (on), and '!,@,#,...' (on). At the bottom of the form is a 'Length' field with the value '32' and minus/plus buttons. A 'Delete' button is at the very bottom of the screen.

Carrier	8:44 PM	100%
Done	Deatils	Save
Name, description	iTunes - John	
Login, user name, e-mail	john.smith@jz-it-konsult.se	
Password	99H n\CJnaAGcy_\$o; f_:aHp{-/P]%	
	<button>Generate</button>	
A,B,C,...	<input checked="" type="checkbox"/>	1,2,3,... <input checked="" type="checkbox"/>
a,b,c,...	<input checked="" type="checkbox"/>	!,@,#,... <input checked="" type="checkbox"/>
Length	32 <input type="button" value="-"/> <input type="button" value="+"/>	
<button>Delete</button>		

LoginIt details view shows details about login:

- 1) Name, description – name of login record shown in main view.
- 2) Login, user name, e-mail.
- 3) Password.

Just enter data and tap “Done” or “Save”.

If you wish you can generate strong random passwords, which are highly secure and difficult to crack or guess.

Controls in this view:

Done

Terminate view without saving changes. When changes were made user will be prompted for decision what to do, by following alert:

The screenshot shows an iOS settings form titled "Deatils" (sic). The form has a "Done" button at the top left and a "Save" button at the top right. The form contains several text input fields: "Name, description" with the value "iTunes - John", "Login, user name, e-mail" with the value "john.smith@jz-it-konsult.se", and "Password" with the value "99H|n\CJna". There is a "Generate" button next to the password field. Below the password field, there are three toggle switches: "A,B,C,..." (checked), "1,2,3,..." (unchecked), and "a,b,c,..." (checked). There is also a toggle switch for "!,@,#,..." which is checked. At the bottom, there is a "Length" field with the value "32" and two buttons, "-" and "+". An alert dialog is displayed in the center of the screen, asking "Data has changed. Do You want to save it?" with three options: "Yes", "No", and "Cancel".

User will have three possibilities:

- 1) Save changes, and exit, by choosing "Yes".
- 2) Discard changes and exit, by selecting "No".
- 3) Continue editing, by selecting "Cancel".

Save

Terminate view and save changes. When data is not consistent you will get one of following alerts:

Record with same name/
description already exists!

OK

There is already record with same name/description as current record.

Name/description is empty!

OK

You are trying to save record without name/description.

'User name/login' and
'Password' are empty!

OK

You are trying to save record without login and password.

It is warning about empty password, if you want to have it so tap “Yes” otherwise tap “No”.

It is warning about empty login, if you want to have it so tap “Yes” otherwise tap “No”.

Generate password.

Use capital letters in automatically generated password.

Use lower case letters in automatically generated password.

1,2,3,...

Use digits in automatically generated password.

!,@,#,...

Use special characters in automatically generated password.

Length

32

Defines length of automatically generated password.

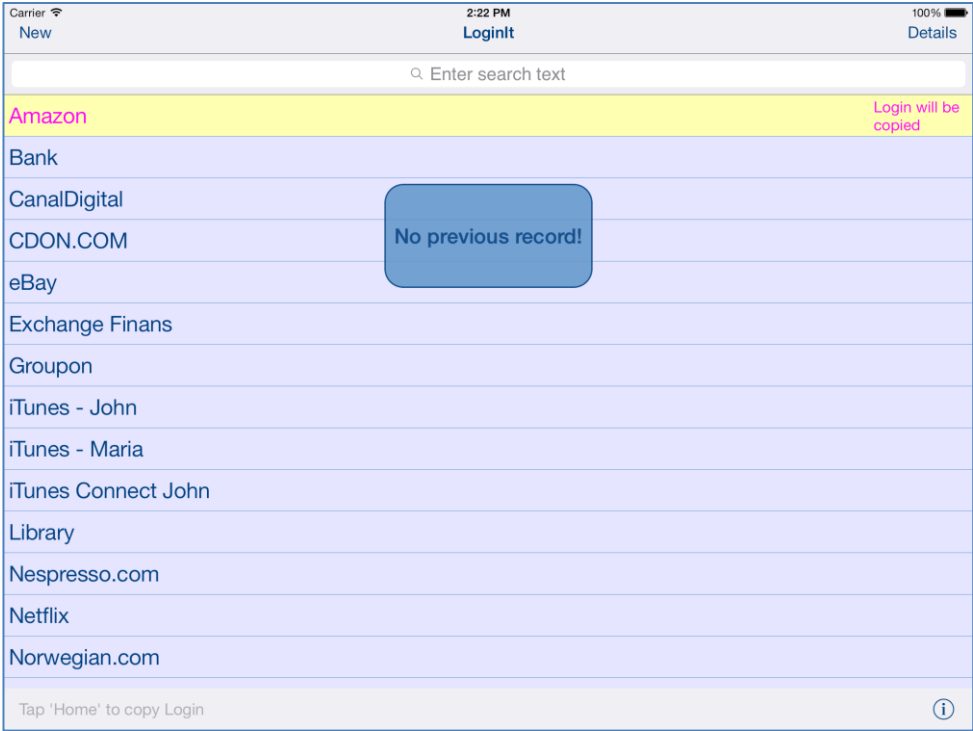

Swiping to the right.

Same effect as taping “Done” button.

Swiping up moves to previous record and shows it in Details view.

It has same effect as:

- Tapping “Done”
- Selecting previous record
- Tapping “Details”
- When there is no previous record, the following will be shown:

Swiping down moves to previous record and shows it in Details view.

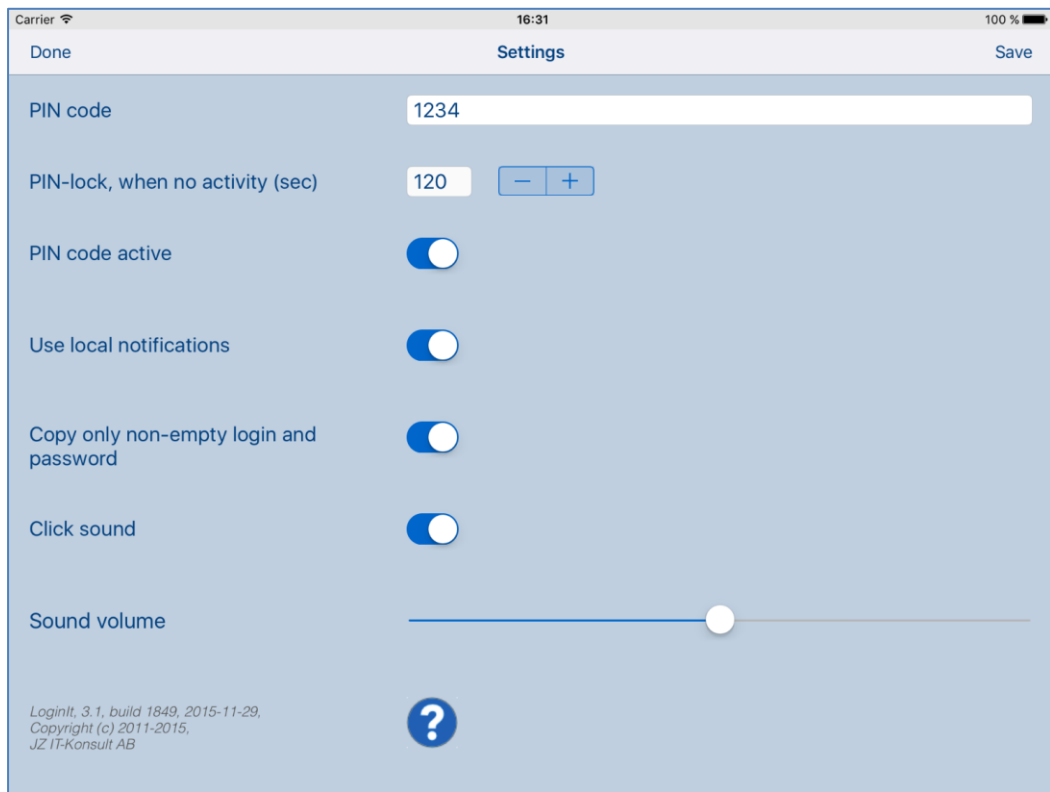

It has same effect as:

- Tapping “Done”

- Selecting previous record
- Tapping “Details”
- When there is no next record, the following will be shown:

6. Settings view

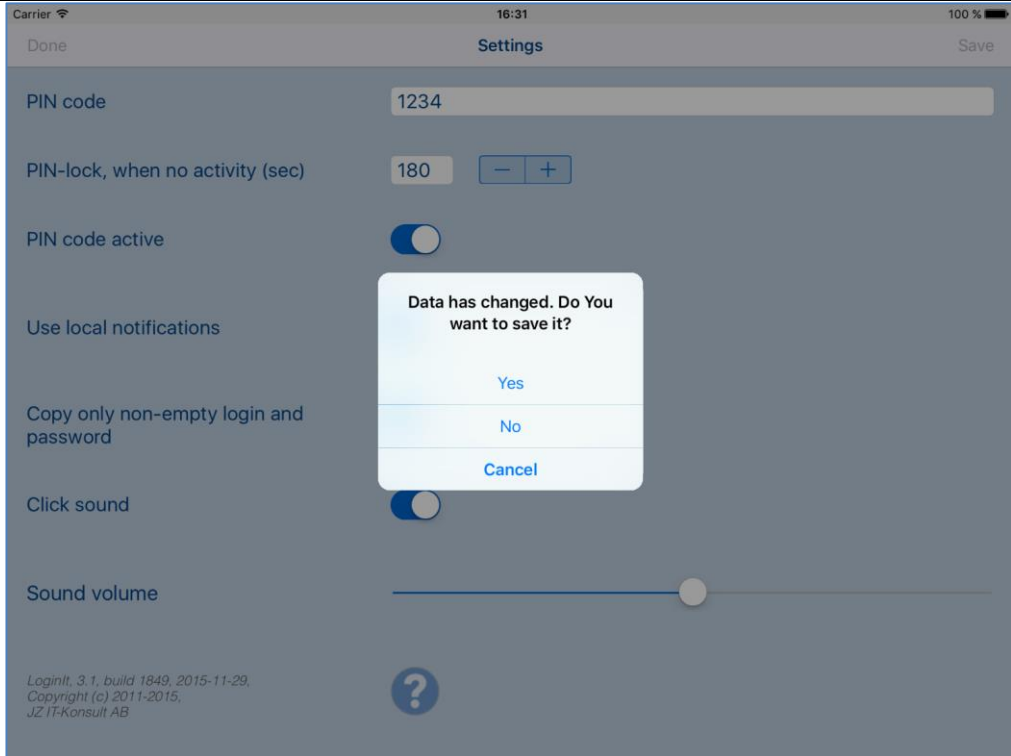

This view allows you to configure system parameters and settings. From this view you have also access [Help view](#).

Here is detailed description of controls available from settings view:

Done

Terminate view.

When changes were made user will be prompted for decision what to do, by following alert:

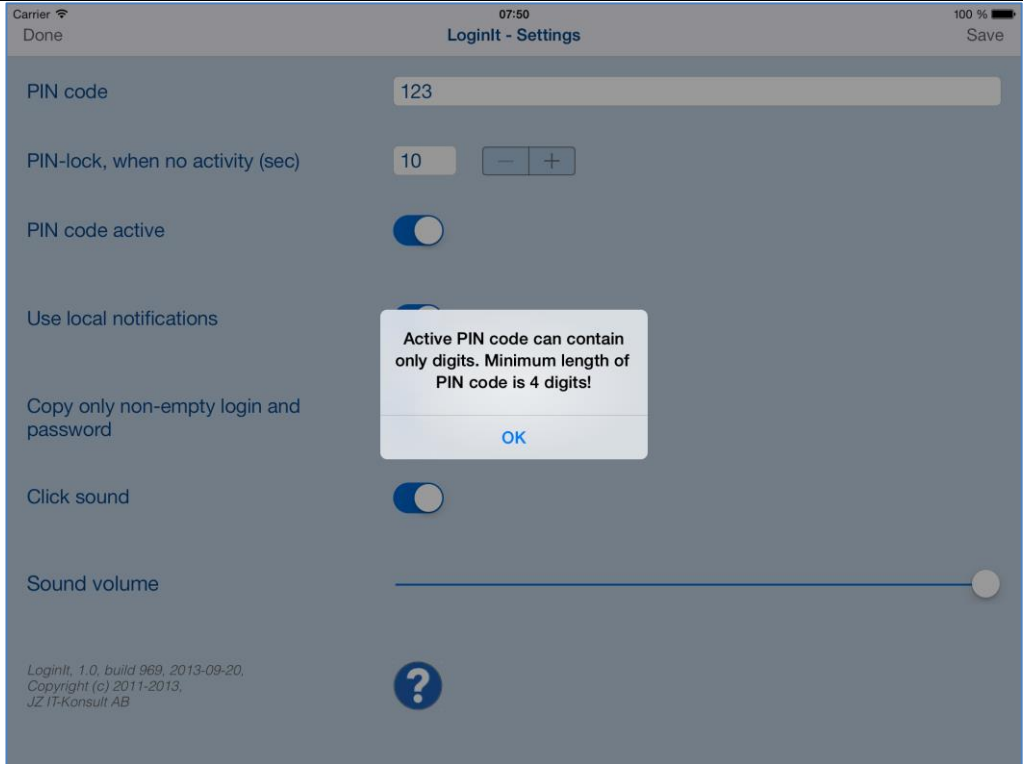

User will have three possibilities:

- 1) Save changes, and exit, by choosing "Yes".
- 2) Discard changes and exit, by selecting "No".
- 3) Continue editing, by selecting "Cancel".

Save

Terminate view and save changes.

When data is not consistent you will get following alert:

Pin code must contain only digits.
Minimum length is 4 digits.

Show [Help view.](#)

PIN code	1234
----------	------

PIN code used to protect app data.

PIN-lock, when no activity (sec)

10

–

+

Determines time before app will be locked, when there is no activity in app. When app is in [Help view](#) locking is de-activated.

PIN code active

Determines if PIN code is active – in use.

Use local notifications

Determines if local notifications will be used to inform about copied items.

Copy only non-empty login and password

Determines if only non-empty login items will be used for copying.

Click sound

Determines if sound effects will be used in app. Setting affects:

- Click sound
- Alert sound
- Local notifications sound

Sound volume

Determines volume of sound effects in app.

Swipe to the right

Same as Done-button.

7. PIN code view

This view is used to enter PIN code, when PIN code is activated.

View will appear, when there is no activity in the app during time determined I app settings. It does not matter if app is running is in background or terminated.

Setting of “PIN-lock when no activity” to something beatween 30 and 60 seconds should be enough to copy and paste login and password without re-entering PIN-code.

When wrong PIN code is entered 3 times in sequence app will be locked for 3 minutes. When after that wrong PIN code is entered 3 times in sequence app will be locked for 6 minutes, and so on:
